AMERICANS OCCUPY FRONT LINE TRENCHES

Nation is Thrilled By Latest Announcement

Only Regarded as Final Phase of Men's Training—Casualties to be Expected—Position Described as One of Quietest Sectors on the Front.

Washington, Oct. 27.—The nation was thrilled today by word that American troops at last were face to face with the Germans across no-man's land. Announcement by General Pershing that several battalions of his infantry were in the front line trenches, supported by American batteries which already had gone in to action against the enemy, fanned a new flame of patriotism throughout the country. The absolute silence with which Secretary Baker and war department officials greeted the news however, showed that although the movement into the trenches had been expected at any time, it was regarded only as the final phase of the men's training—a military finishing-school conducted under fire—a school of blood and iron. German shells are breaking about the Americans and, although they have not taken over the trench sector, rifles, machine guns, bombs and bayonets in American hands will greet any enemy attack.

The silence of Secretary Baker indicated that no official report of the occupation of the trenches had been received. General Pershing is the judge of all matters pertaining to the training of his force and probably did not inform the department of his plans in advance, as every effort was made to prevent the enemy from learning what was afoot.

It is certain, however, that the department was fully prepared for the news. Secretary Baker's latest review of the war situation this week indicated that American troops in France were nearing the end of their strenuous training behind the lines. Events prove that they have progressed so rapidly in the art of modern trench warfare that their commanders and French instructors believed them ready for the final lesson.

Casualties among the American forces are to be expected. Reports from the front already show the intermittent artillery firing and a well aimed shell may claim American victims at any moment. There is nothing to indicate, however, that an offensive operation by the Americans and their French associates is to be expected, outside of possible trench raiding. The sector where the front line training school has been established is described as one of the quietest on the front and if this condition continues, it will tend to minimize losses.

There is believed to be some good reason why the sector is quiet. It may be the feeling on both sides that nothing is to be gained by attack and counter-attack. The character of the country, disposition of reserve bases, difficulties of transportation or many other considerations might be responsible for the inactivity.

Final Rehearsal for Conflict
The report from the front indicates that all American forces will be given trench duty in reliefs as the final touch of their preparation. The whole business of relieving and supplying the front lines can be carried on under actual war conditions and under fire. It appears to be a military final rehearsal for the grim days of conflict to come and such fighting as may occur probably will serve only to give the men zest for the greater adventure ahead.

In time, a complete section of the front will be Americanized in every detail. How wide this front will be, where on the long line it is to be located, and similar questions are matters about which no speculation is permitted. Today's announcement brings appreciably closer, however, the day when the actual fighting front of the American army in France will be established and when American energy will be engaged directly in the task of crushing German military power.

The long period of waiting and preparation is past its first irksome stages. From now on the military power of the United States in France will grow steadily and the results of the months of army building will begin to make themselves felt in hard-driven steel against the German ranks.

GIFT TO RED CROSS SOCIETY

The pupils of the Sunnyside School who are very happy and cheerful have been unusually "sunny" the past week. The school having prepared an exhibit for the Farmers' Institute at Chapin, the directors granted the pupils a holiday on Wednesday in order that they might attend. This made Wednesday a glad day which was made more so by the news that their exhibit had been awarded the "blue ribbon." Supt. Vasconcellos visited the school on Thursday and put in place the Standard School Sign.

Realizing that their patrons and friends had done much for them, the children decided to "do their bit" and show "their patriotism" by presenting the "prize money" to the Red Cross Society.

THE MOTHERS' MEETING

All mothers of Soldiers and women of Morgan County, who are willing to represent a soldier in the U. S. Army are requested to meet at the Public Library, Wed., Oct. 31st, at 2:30 p. m. The nominating committee will report at this time. It is urged that each soldier be brought to this meeting at the members want to make plans to help the boys have a good time Thanksgiving.

WANTED TO SEE IF IT WORKED

Saturday night Manager Thompson of the Woolworth store called the police and had an aged man taken to the police station and searched. He had been looting around the store all afternoon and it was suspected that he had lifted something. It was found that he had a soap holder. The explanation given the police was that he wanted to try it and if it was satisfactory he intended to go back and pay for it. He was released after being cautioned, as Manager Thompson did not care to prosecute.

HORSE AND FORD CAR COLLIDE; HORSE DEAD

Horse Belonging to Roy Florence Struck by Ford Car Driven by John Burns of Murrayville—Horse Injured So Badly Had to be Shot—Florence and Young Woman Thrown from Rig and Slightly Bruised.

A horse owned by Roy Florence of this city was struck by a Ford car driven by John Burns of Murrayville about 10 o'clock Saturday night and injured so badly that it had to be killed. Burns was taken to the police station after the accident but was not held as Florence did not swear out a warrant.

The accident happened on North East street about 40 feet north of Washington street. Florence was driving north and Burns was driving south when the accident occurred. Burns claims to have been blinded by a light in that vicinity and thought he was on the right side of the street.

The car struck the horse head-on and knocked it down breaking one of its hind legs. Florence and a young woman who was riding with him were thrown out but received only slight bruises and a severe shaking up. The harness except the bridle was entirely stripped from the horse. The only damage to the car was a bent fender.

Officer Ray Hogan was apprised of the accident and went to the scene and took Burns and a companion who was with him, to the police station. Burns gave his name and address and it is probable that he will arrive at a settlement with Florence for the horse which the latter said he valued at \$225.

Dr. Carter was called to examine the horse. After it was found that it had sustained a broken leg the animal was shot.

RELIEF FROM SUGAR SHORTAGE PROMISED

New York, Oct. 27.—Relief from the acute sugar shortage in New York within the next fifteen days is promised by B. A. Rolph, chairman of the sugar division of the federal food administration, who arrived here yesterday after conferences with refiners in Louisiana. Mr. Rolph said the price of granulated sugar would be 8 1/2 to 9 cents a pound. His promise was made after an all day conference with American and international refiners committees.

WILL ATTEND MEETING

H. A. Perrin, superintendent of the Jacksonville schools, will attend the joint meeting of the State School Board association and the City Superintendent's association of Illinois, which will be held in Peoria Nov. 21 and 22. Mr. Perrin is a member of the City Superintendent's association and will be the only local representative at the meeting.

An important feature of the gathering will be the election of officers for the coming year. The officers of the two associations now serving are:

School board association—President, R. C. Augustine, Decatur; vice president, F. F. Hall, Dundee; secretary, Mrs. G. A. Stover, Oak Park; treasurer, E. H. Renner, Urbana. City Superintendent's association—President, L. A. Mahoney, Moline; vice president, L. W. Haviland, Wataska; treasurer, A. S. Anderson, Mt. Carmel; secretary, H. G. Russell, Beardstown.

Among the prominent educators who will appear on the program is President David Feimly of Normal University at Bloomington, who will discuss the subject, "More School Revenues." Dr. W. W. Charters of the University of Illinois will be another speaker, presenting a subject of present day importance to the educational world. The program includes other well known speakers and the two days' sessions promise to be of great profit to all who attend.

STOUT PROMOTED

Word has been received in the city from Paul J. Stout, who has been stationed at Ft. Hancock, N. Y., that he has been promoted to the rank of sergeant. He drills about seventy five men six hours daily. He is now located at Camp Lee, Virginia, and expects soon to get his furlough and be at home for a while.

FUNERAL NOTICE

Funeral services for the late James H. Silcox will be held Tuesday afternoon at 2 o'clock at the M. E. church in Concord, Rev. Royal W. Ennis of Mason City, formerly pastor at Concord, will be in charge. Burial will be made in Concord cemetery.

D. A. R. WILL MEET

James Caldwell Chapter, D. A. R. will meet with Miss Trubue Tuesday afternoon to sew for the Red Cross.

Word has been received from Mrs. Robinson E. Scott of her safe arrival in Louisville, Ky. Mrs. Robinson goes to Louisville to remain while her husband is in training at Camp Taylor. She will live with Mrs. Curry while in Louisville.

AUSTRIANS TESTING METTLE OF ITALIANS

Tremendous Teutonic Drive On Isonzo Front Continues

Berlin Claims Defeat of Cadorna's Men in This Section and Announces Capture of 60,000 Men and 450 Guns.

Italy's mettle is being critically tested by the tremendous Teutonic drive under command of Emperor Charles of Austria on the Isonzo front, with what seems virtually the entire Austrian army and strong German forces. From the first blows General Cadorna's second army has suffered a serious shock and Berlin claims the defeat of this section of the Italian forces, from which it announces the capture of no less than 60,000 men and 450 guns. These grave losses seem to bear out the German claims as to the fate of this Italian army, but apparently the crucial hour has not yet come which will determine whether the Austro-German host can be held at the mountain passes and prevented from overflowing into the fertile plains of Venezia.

Semi-official utterances reveal that all possible preparations have been made in Rome to meet the great emergency. Each day however, sees the invading armies making additional headway. Commanding Italian heights along the border east and northeast of Tomiline are beginning to fall, while Berlin claims that virtually the entire Italian Isonzo front has been shaken.

From the western front the most important news to Americans was that announcing the presence of American troops in the first line trenches alongside French infantrymen, and of American artillery parking with French batteries sending the first American aimed shots of the war at the German lines. These troops have not taken over the quiet sector in which they are stationed but are under French direction. The first statement issued from American Headquarters in France reported the men adapting themselves most satisfactorily.

The British in Flanders were engaged Saturday in making secure the positions they won Friday, the more important of which was that on the Bellevue Spur, west of Passchendaele, a valuable dominating ridge brilliantly taken and held by the Canadians in hard fighting. The French on the Flanders line went further ahead Saturday, capturing German trenches north of the position reached on Friday. The Russians are continuing to move ahead in the Rika region, apparently with some caution.

ILLINOIS NORMAL WON FROM ILLINOIS COLLEGE

Illinois Outweighed But Played Wonderful Defensive Game—Ferreira Kicks Goal from 40 Yard Mark—Coach Harmon Pleased with Showing.

Illinois College was defeated by Illinois Normal at Normal Saturday by a score of 19 to 3. The defeated Illinois men have no reason to be ashamed for they were outweighed about 20 pounds to the man and in addition Mackie and Wheeler two of the strongest men on the team were able to play only a few minutes of the first period.

Easily the feature of the game was the drop kick by Ferreira from the 40 yard line. Tre ball sailed squarely between the goal posts and it revealed to Coach Harmon that he has a way of scoring in a close game by the air route. All of the Illinois men played a good game especially on the defense. Coach Harmon said last night that the men seemed to find themselves in the Normal game and he looks for some good work in the remaining games of the season.

Normal scored her first touchdown by a series of forward passes, the final one being caught over the goal line. The goal was missed. The second touchdown came when Normal intercepted a forward pass and carried the ball 50 yards for a touchdown. The goal was also missed on that touchdown. No further scoring was done during the first half.

In the third quarter Illinois outplayed Normal and worked the ball down the field where Ferreira made a pretty drop kick from the 40 yard line. In the final quarter Normal scored her last touchdown. The score came thru a series of line plunges by the heavy backfield. Goal was kicked which was the only one Normal negotiated during the afternoon.

The lineup of Illinois follows: Barnes and Curran, left end; Mackey and Shoemaker, left tackle; Andrew, left guard; Miller, center; Deigh and Bronson, right guard; Underwood, right tackle; Dunscomb, right end; Ferreira, quarter; Whisler and Barnes, left half back; Cox, right half back; Cully, full back; Sears, substitute.

FRANK KILORAN GETS GOOD PLACE

Frank D. Kiloran of Chicago is visiting his aunt, Miss Catherine Kiloran, 222 Howe street. The young gentleman was employed in the Union Pacific office of the great city and has enlisted and has been appointed stenographer in the navy and will probably be assigned to some war vessel. The young gentleman is a son of Patrick Kiloran and is one of the young men of the city who have gone elsewhere to seek their fortunes and have made good. His friends will be gratified to learn of his appointment.

SOUTHWELL DIES AT SPRINGFIELD HOSPITAL

SHOT FIRED BY WINCHESTER MAN PROVES FATAL

Body is Taken to Winchester Last Night—Survived by One Brother and One Sister—No Funeral Arrangements Made—Other Scott County News.

Winchester, Oct. 27.—Word was received here by relatives of the death of Charles Southwell, which occurred at Springfield hospital at 3 o'clock this afternoon. Southwell was shot by William Dill Wednesday morning at about 10 o'clock. Mr. Southwell was taking leave in front of his property, the second floor of which is rented by Mr. Dill, when the latter leaned out of an upstairs window and shot him. The bullet struck in the unfortunate man in the head and little hopes of his recovery were had by the doctors attending him. Deceased was 73 years old. C. N. Danvers accompanied the remains to Winchester by motor Saturday evening. Mr. Southwell was the son of Mr. and Mrs. Robert Southwell, both of whom preceded him in death many years ago. He is survived by one brother, William Southwell of Winchester, and one sister, Mrs. Ellen Sanderson of Berlin, North Dakota. Mrs. Sanderson arrived in Winchester this morning.

Mr. Southwell, while not actively engaged in business in Winchester for a number of years past, had kept busy looking after extensive property interests. He owned quite a little real estate in Scott county and one of the many good qualities for which he will be remembered was his kindness to his neighbors, and his kindly spirit he exhibited toward all with whom he had business dealings. He was a man of mild demeanor, never looking for the show in life and merely satisfied to attend to his own affairs in a business-like way. He will be remembered by many in Winchester and vicinity for many acts of kindness. No arrangements for the funeral have been made.

Mr. and Mrs. S. G. Smith entertained the following guests at a 6:30 o'clock supper Saturday evening: Mr. and Mrs. Marcy W. Osborne, Mr. and Mrs. Leon Bell, Mr. and Mrs. George Orser, Miss Millie Rowe, Dr. F. A. Norris, Paul Samuel, Wilfred Ayers, Richard Rowe, all of Jacksonville; Mr. and Mrs. Alfred Schulz, Beardstown; Mr. and Mrs. J. C. Grout, Winchester.

R. A. Harker arrived Friday night from Greenfield, Ind. to visit his brother, Ralph Harker, and family. The women of Winchester over sixteen years of age will register Nov. 7th, in accordance with the plans of the Illinois division, National Council of Defense. Mrs. G. D. Demerutis is chairman of the Winchester unit.

Miss Bessie Conliss, teacher at the Hart school seven miles east of Winchester, planned a box social which was given Friday evening at the school house and was much enjoyed by all present. Pupils of the school and patrons were present in goodly number and the receipts were over \$35. A short program was one of the features of the evening. This was one of the first social events to be given by schools of Scott county this fall.

Mr. and Mrs. Arthur Jinkins and two sons have returned to their home in Bentley, Ill., after a week's visit at the home of Mr. and Mrs. Elmer Coultas. They made the trip thru in their car.

Mrs. S. E. Thomas returned home Saturday noon from Roodhouse, where she has been visiting the past few days.

Miss Amelia Hieronymus and sister, Mrs. Michael Cleary of Jacksonville, expected to spend Sunday in Quincy with their sister, Miss Olga Hieronymus, who is attending the Gen City Business college there.

Mr. and Mrs. Withee of Greenfield are guests of Mr. and Mrs. C. W. Barnes.

C. N. PRIEST IS BRANCHING OUT
C. N. Priest, the energetic Ford man, has bought the garage business of Antrobus & Joy at Chapin and will shortly move his establishment to the building owned by William Edelbrock where he will have a fine, commodious and up to date garage ready to serve the many local patrons and the many travelers who will pass thru the place or desire to remain in it over night. Messrs. Antrobus & Joy will be in the employ of Mr. Priest and will see to it that all patrons receive the best of service. Mr. Priest means to make his Ford station at Chapin one of the best, just as he has a plant here which seems to lack nothing which a garage should have.

The gentleman already has garages at Winchester and Bluffs and has his eye on Mercedia as a desirable point at which to establish a Ford plant.

PATRIOTIC MEETING AT WOODSON TODAY

A patriotic meeting will be held in Woodson church this afternoon at 2:30 o'clock. The address will be delivered by the Hon. Hugh Green of this city. Miss Elson Barnes will talk on women's registration. Patriotic music will be a feature of the program.

MEETING POSTPONED

The meeting of the Orleans Women's club which was to be held with Mrs. James Cunningham on next Tuesday has been postponed indefinitely. The annual meeting which was to have been held Nov. 1, has been postponed.

LIBERTY LOAN PASSES MAXIMUM AMOUNT

Last Day's Drive Rounds Up More Than \$1,000,000,000

Federal Reserve Banks Will Not Complete Tabulations for Several Days—New York Total Will Run Up to \$1,650,000,000.

Washington, Oct. 27.—The Liberty Loan apparently has passed the \$5,000,000,000 mark.

A last day drive of titanic proportions through the nation rounded up more than \$1,000,000,000 and was believed to have carried the total several hundred million dollars beyond the maximum hoped for.

Federal reserve banks probably will not be able to complete their tabulations for several days.

The treasury's early tabulation of returns, based on estimates received from the reserve banks, showed a total of \$4,555,000,000. This was admittedly an under-estimate. At the hour the tabulation was made subscribers were standing in line in thousands of cities and towns throughout the country and most of the 26,000 banks were swamped with unreported subscriptions.

The treasury's compilation by districts follows:

Boston	500,000,000
New York	1,500,000,000
Philadelphia	425,000,000
Richmond	180,000,000
Atlanta	100,000,000
Chicago	550,000,000
St. Louis	200,000,000
Minneapolis	130,000,000
Kansas City	160,000,000
Dallas	85,000,000
San Francisco	275,000,000

With its maximum safely passed at sundown, the New York district went forging ahead by artificial light. Officials here were informed by telephone that New York's total would run up to \$1,650,000,000. This would swell the department's figures to \$4,705,000,000.

MILLER WEIR HOME FROM SPEAKING TOUR

Made Trip Thru Southern Illinois in Interest of Liberty Bond Issue—Was with Former Governor Yates—Great Enthusiasm Shown By Citizens.

Miller Weir returned last evening from his final itinerary which he has made through the southern half of the state in behalf of the liberty loan. He has been enabled to do this work through the courtesy of Hon. Andrew Russell, state auditor, who has generously released Mr. Weir from his official duties and permitted him to devote his time to patriotic purposes.

Mr. Weir and ex-Governor Yates have been doing team work in these forty-four counties and have been industriously lighting the fires of liberty on the tops of the hills and in true beacon light style. Mr. Weir was the official organizer of the Liberty Loan organization and has done strenuous work along with his illustrious colleague. He goes into a county, collects the bankers and makes them an address and then gets the people together for a mass meeting where they hear the truth from the brilliant orator who has accomplished so much for his state and country.

On the last trip Mr. Weir visited eight counties along with ex-Gov. Yates and in two weeks took subscriptions for more than three million dollars worth of bonds. At Nashville, Washington county, they had some doubts as the community is largely German but these resident Germans are getting their eyes open and finding out the best and wisest course to pursue. The usual procedure was followed and the result of the visit was the sale of \$182,000 worth of bonds. In Monroe county, just out of East St. Louis, the population is largely German. Waterloo is the county seat and there the visit was successful. In Gallatin county they visited Equality and Ridgeway and at each place had fine success. At the public meetings packed houses greeted ex-Gov. Yates who spoke with his usual fiery eloquence holding his audience spell bound by his oratory and earnestness. After the speaking at Equality the people at large took over \$5,000 worth of bonds.

St. Louis is afire after the order of Civil war times. On the steps of the union station several army officers collected and a citizen stood there and to a large gathering in the street made an impassioned plea for loyalty and generosity in subscribing to the liberty bonds.

The general committee in the 44 counties named is headed by E. E. Crabtree of this city, chairman, and great credit is due that gentleman for the devotion he has manifested to the cause, the ability he has shown, the success that has followed his efforts and the patriotic conduct of the man who gave up his own business to serve his country. The counties he represents will subscribe fully 12 to 15 millions which will be the full quota and more. Mr. Weir said he had received encouraging news from Washington and was fully persuaded that the whole liberty loan will be taken at once.

WILL GIVE SUPPER

The ladies of the Christian church have kindly consented to serve a supper on Nov. 15th at 6 P. M. for the benefit of the Humane Society. Many generous and toothsome contributions have already been promised and let everybody interested in maintaining a society in Jacksonville remember the date and buy a ticket for the supper. You will have all you can eat, and a splendid menu will be printed later.

VISITED INSTITUTES

D. T. Heimlich has recently completed a tour of farmers' institutes which covered the greater part of the past week. Among the institutes visited was that at Table Grove, where it was estimated more than 600 persons were in attendance. Mr. Heimlich also visited the institute at Lewistown and acted as judge of the poultry show at Waverly, held in connection with the farmers' institute. He reports a considerable shortage of poultry this year, due probably to the high cost of feed.

EXEMPTION BOARD PASSES ON CLAIMS

SIXTY-FIVE GRANTED CLAIMS—SEVENTEEN REFUSED EXEMPTION

Have Opportunity to File Appeals to District Board at Springfield On Dependency or Industrial Grounds.

The local exemption board Saturday passed on the claims of the men who, out of the last 180 examined, had claimed exemption. Seventeen of those claiming exemption on the ground of dependency have been refused exemption and certified to the district board as being liable for service. Those of the seventeen who wish to appeal from the ruling of the local board to the district board at Springfield on grounds of dependency have ten days in which to file their claim. The local board does not make any ruling on the ground of industrial claims and all wishing to appeal their cases to the district board on industrial grounds have five days in which to file such claim. The sixty-five men who have been granted exemption on their claims of having someone dependent upon them for support are subject to being recalled at any time as the order of the local board can be revoked should any emergency demand it.

Nothing has been received at the office of the local board in regard to new orders which have been given some publicity in regard to classifying the remainder of the registered men of the county. It may be that when these new orders of classification arrive, some changes will be made in the last list of men exempted.

Claims Rejected

The names of the men whose claims for exemption on grounds of dependency were refused by the local board and who have been certified as ready for service are as follows:

PRESIDENT GRANTS INCREASED COAL PRICE

New Price Will Absorb Wage Raises Recently Agreed Upon

Quotations on Bituminous Coal to Shoot Upward 45c per Ton at the Mines Tomorrow—Effect of Price Raise at Illinois Mines.

Washington, Oct. 27.—President Wilson tonight granted an increase of 45 cents a ton in the price of bituminous coal at virtually all the mines in the country effective at 7 o'clock Monday morning. The new price will absorb wage raises recently agreed upon between operators and miners in the central competitive and other fields.

Millions of dollars of increased cost to consumers is involved in the order, which was based on recommendations to the president by Fuel Administrator Garfield after survey of conditions in all districts.

The order refers specifically only to the wage agreement entered into at the conference in Washington, Oct. 6 between operators and miners in the central competitive field of Ohio, Illinois, Indiana and Pennsylvania, but wages throughout the country are largely based on those paid in the central district.

Prices at Illinois Mines

Springfield, Ill., Oct. 27.—As a result of the increase of 45 cents a ton in the price of bituminous coal allowed today by President Wilson, coal at the mine mouth in Illinois will sell at the following:

Prepared sizes, \$2.65 a ton.
Mine run, \$2.40 a ton.
Screenings, \$2.15 a ton.

Prices fixed recently by the fuel administration were \$2.20 for prepared sizes, \$1.95 for mine run and \$1.70 for screenings. Today's prices are 45 cents greater in each case.

Increase in wages to miners, agreed upon by miners' officials and operators will be ten cents a ton for digging coal, \$1.40 for day labor and 15 per cent for yardage and dead-work.

Although the advance is meant to become effective Monday morning, it was stated here tonight by mine officials that the increase cannot begin until November 1. This is due, it was said to the terms of the joint agreement which stipulated that proposed increases in wages become effective with the beginning of the pay period following the date of an announcement by the president which in this case is November 1.

Miners in the northern fields, it is reported, are not satisfied with the Washington agreement and are preparing to demand an increase of 15 cents a ton instead of 10 cents a ton because, they declare, physical conditions make coal digging there doubly difficult.

GO TO SUNDAY SCHOOL SUNDAY

Nov. 4 has been designated as "Go to Sunday School Day" and will be observed by the Congregational Sunday school at the usual hour, 9:30 a. m. The topic of the day will be "The World's Christian Sunday" and the program will be along this line. Dr. Carl E. Black will deliver an address relative to the gain in prohibition on account of the war and its relation to our young men. Special music will also be provided for the occasion and every effort will be put forth to have the entire hour both pleasant and profitable to all who attend. All members of the church and Sunday school are particularly requested to be present and the public generally is invited.

news published herein.

Saturday was the 59th birthday of
ex-President Roosevelt. He improves
with age.

When the cry of scarcity of some
food product is announced the price
goes up about a hundred per cent.
And the public pays.

Advice is cheap, especially when
they tell us how little we need. How
would it do to "regulate" the men
who manipulate prices?

Miss Jane Addams, of Hull House
fame, is touring the country speak-
ing to women in favor of Hoover's
plan of food conservation.

It is not only Senator LaFollette
but the State of Wisconsin who will
be tried on the score of loyalty in
the coming special senatorial elec-
tion in that state.

A special assembly of Jews of the
United States will meet in New York
today for continuation of Jewish war
relief and to endeavor to raise a
fund of \$10,000,000 for war suffer-
ers.

The work of the present state ad-
ministration has been termed "mod-
ern business gumption applied to
state affairs." Wm. H. Stead, a
member of the state board of admin-
istration is the man who said it, but
it is true, nevertheless.

LIBERTY BREAD.

"Liberty bread," made from bran,
rye, barley or corn, instead of wheat
flour, will be placed on sale as soon
as the domestic science department
of the University of Minnesota ap-
proves formulas submitted by the
bakers of Minneapolis and St. Paul.
This step will be taken, he said, as a
war-time measure to conserve the
supply of flour.

WANTS TO CHANGE NAME.

A New York judge has refused to
permit Oscar William Bleech, an
American citizen of German birth, to
change his name to Blake, on the
ground that by granting the petition-
er's request he might promote the
practice of deception. Recent events
have made it clear that it is well to
conserve German names in the United
States, for purposes of identifica-
tion. Mr. Bleech may be all right
in every particular but it may sim-
plify matters if he shall not hereafter
be known as Mr. Blake.

CUT OUT THE TURKEY.

It is intimated by Mr. Hoover, that
the American people will be request-
ed to dispense with the usual sort of
Thanksgiving dinner this year, and
be satisfied with a more modest rep-
ast. In the interest of conservation.
Everything considered, this will not
be asking too much. One of the possi-
ble results of popular compliance
with the request, if made, will be a
reduction in the price of turkeys to
a point where people with ordinary
incomes may be able to buy them
more.

ITALIAN REVERSES.

Italian reverses are to be regretted,
but it is in part a result of the dis-
turbed state of affairs in Russia. The
northern end of General Cadorna's
line was overwhelmed by Austrian
artillery fire, and division after divi-
sion of well disciplined German troops
brought from the Russian front to
stiffen their weak allies. Gloomy
news, as well as good must be ex-
pected. The fighting spirit of the
Italians is in no way affected. The
line nearest Trieste, the main Italian
objective, holds firm.

INDIANS IN THE SERVICE.

Indians of Canada were refused
for overseas service by the dominion
government, but they remained loyal
and from their tribal funds voted
contributions to the Red Cross; they
bought machine guns and presented
them to the government; individual
Indians gave generously from the
small earnings of their fishing, hunt-
ing and trapping to the war relief
fund. And thus they won the right
to go to the firing line. In January
of this year a battalion from London,
Ontario, landed the first Indian unit
in France—the Middlesex Indians.
Others have followed. The red man
now fights shoulder to shoulder with
his white brother, and his worth as a
fighter has been proved.

MOORE DID IT.

Col. Dan T. Moore, commander of
the Three Hundred and Tenth Field
Artillery, Seventy-ninth Division,
National Army, now claims to have
been the boxing partner who caused
Roosevelt's loss of an eye. Col.
Moore never knew until Col. Roose-
velt confessed the blindness that his
punch had such serious after-effects.
"I shall write the colonel a letter in
a few days expressing my regrets,"
said Col. Moore. "I cannot do more
and I certainly won't do less."

The boxing bout occurred in the
gymnasium of the White House in
1905. Moore was military aid to the
president and was his favorite spar-
ring partner. Other military aids
were Granville Foresque, now a major
in the National Army, and Phil
Sheridan, son of Gen. Phil Sheridan.

THREE CENT STAMPS.

Beginning next Saturday the three
cent stamp comes into its own. Post-
offices all over the country will be
plentifully supplied. The bureau of
engraving and printing has its power
presses at work now turning out the
reserve stock of 600,000,000 always
kept on hand. The 3-cent is being
printed off the same die now used.
The purple ink will be retained. The
stocks of twos on hand can be used
for letters after November 3 by sup-
plementing with a one. A large
number of twos will also be needed

for local drop letter service in cities
having carrier delivery—the 2-cent
rate for such letters being retained.
The postoffice department does not
look for a decrease in the number of
letters because of the 3-cent rate. It
will be offset by the natural increase.
So the bureau of engraving plans to
supply 7,300,000,000 three-cent
stamps—approximately the number
of twos used last year. Only 130,-
000,000 twos were used last year—
mostly for parcel post packages. The
number of ones printed will be the
same as last year—4,200,000,000.

COLUMBIA'S MARTYRED BOYS.

Beneath old ocean's briny wave,
Lie countless thousands buried deep.
Where now from home of free and
brave
Columbia's martyred boys sleep.

Down sank they to their lowly place,
While homeward bound from zone of
war.

A smile of glory on each face,
And hearts that loved our every star.

'Twas hatred fired the shot that tore
Far o'er the crested billows white,
While wrong for all the world it bore
Desire to quench fair Freedom's
light.

But underneath, around, above,
The averlasting stars are seen,
And greater far a Father's love
Than power of shot from submarine.

Then roll blue ocean while we pray,
Surge o'er the rocks and caverns
deep.

While undisturbed by war today
Columbia's martyred boys sleep.
—S. A. Hughes.

IN THE TRENCHES

Associated Press reports inform us
that United States troops are now
actually in the trenches somewhere
in France. We have seen our boys
of Co. B leave their homes to enter
the federal service, we have bidden
many good-bye when they enlisted
in the various branches of the army
or navy, and more recently there was
an outpouring of the people to escort
men leaving for Camp Taylor, to
God-speed them on their way. We
mildly regretted their going, it seem-
ed they were only leaving for a short
time, for a picnic. The announce-
ment that our troops are in the
trenches battling with the German
enemy, comes as a shock. It must
bring home to every doubter, to
every man who has believed that our
troops would never be called to the
over-seas war the fact that our
troops must take their chances of
death, by shell or gas, bullet or
liquid fire, as the many diabolical
means of destruction that have been
developed in the past few years.

Alongside the French and British and
representatives of dozens of other
nationalities now fighting kaiserism,
Morgan county has men over there.
But whether they are from our own
locality or not, they are our brothers
and while we hope their entry into
the trenches may hasten termination
of the war, yet we know that death
awaits many before we have peace.

FOOD PLEDGE WEEK.

With one hundred thousand ser-
mons delivered from as many pulpits
throughout the length and breadth
of the land, Food Pledge Week will
be ushered in today and during the
ensuing seven days it will be carried
forward with the same zest and en-
thusiasm that have characterized the
successful drive for the second Lib-
erty Loan. Those in charge of the
plans expect that this nation-wide
campaign to complete the equip-
ment of America's forces in conservation
of her food supply will be one of the
most successful of the popular cam-
paigns carried on since the begin-
ning of the war.

Calling the Allies the country's
first line of defense, and pointing
out that the world expects America
to guard and provide its food supply,
Food Administrator Hoover's appeal
to the nation to observe the week
says:

"We are asking every householder,
every hotel, restaurant and dealer in
foodstuffs in the nation to become
a member of the Food Administration
for conservation and to pledge them-
selves to follow, insofar as circum-
stances permit, the suggestions that
will be offered from time to time as
to measures of food saving.

"For us there is no threat of pri-
vation. We wish only that our people
should eat plenty but wisely and
without waste. Wisdom in eating
is to make possible such adjustments
in our food consumption, shipping
and war necessities as will allow us
to fulfill our duty in exports to our
Allies. By eliminating waste we

serve ourselves economically and
morally.

"I therefore appeal to the churches
and to the schools for their assis-
tance in this crusade, to all the or-
ganizations for defense, local and na-
tional; to all the agencies, commer-
cial, social and civic; that they join
the administration in this work for
the fundamental safety of the na-
tion."

WHAT WAR MEANS.

The Globe-Democrat declares the
speech of Lord Northcliffe in St.
Louis recently an "impressive ser-
mon." Lord Northcliffe showed that
Germany has made no preparations
under autocratic direction of profes-
sional soldiers. Every ounce of Ger-
man energy is being devoted to the
war. The allied amateurs at war
must make equal preparations to end
the war, or series of wars. Hereafter
the allies are to be on the aggressive
and they will require a preponderance
of men and resources.

Having paid nine visits to the dif-
ferent fronts and having kept in
touch with every feature of the war,
he was prepared to give his hearers
advice based on absolute knowledge
and to illustrate with concrete facts
he knew to be facts. That it requires
200,000 civilians at the front back
of every 1,000,000 soldiers, that an
airplane lasts but seventy hours, that
a rifle is good for only a few days
and each soldier must be provided
with three, that his war consumes
vastly more materials than any of his
adversaries, that the quantity and
quality of the food supply of soldiers
must be maintained at an unusually
high standard because of trench war-
fare in damp, cold weather, that am-
munition demands stagger the imagi-
nation, that land transportation of
troops and supplies and the protec-
tion of means of telephonic commu-
nication require enormous quantities
of supplies were a few of the many
facts he gave insisting that Amer-
ica provide ships and more ships.
These ships are not merely to trans-
port soldiers. That can be done safe-
ly, barring what he calls accidents.
But transportation is needed for all
sorts of supplies for the army and
certain kinds of food and fuel for
France and Italy. Ships too speedy
for the submarine are the only solu-
tion. Congress has voted all the
money needed for more ships, but
the importance of this work, while
less spectacular than the development
of airplanes, should receive popular
attention.

The emphasis on stimulating pro-
duction of food, fuel and other war
necessities and conserving things
needed for the successful conduct of
the war should impress every Ameri-
can with his vital part in the war.
England has made more drastic regu-
lations than are necessary here, ever
going so far as to put a farm in
charge of a government agent when
it fails to produce as much as it
should and to fine heavily every per-
son charging more than fixed prices,
but the Hoover campaign in America
against waste and in favor of selec-
tion of foods was highly approved by
Lord Northcliffe as a necessary ex-
ercise of forethought, if we would
win the war. The great lesson of
the visitor's appeal is that every
American citizen must shape his hab-
its and direct his activities toward
aiding the soldiers and sailors and
aviators to win the war.

SOME GOOD STOCK FEEDING

The Drovers' Journal says: Ar-
thur Swain of Sinclair, Ill., sold 68
hogs which averaged 226 pounds
and brought \$16.50. There also was
in this load 6 hogs belonging to his
nephews, Harold and Horace Swain,
which they bought as pigs on April
16, weighing 180 pounds, and which
sold today at \$16.65 and averaged
just 300 pounds. They were fed on
a ration of ground corn and oats,
which cost about \$50, so that their
profit on six hogs was \$213.70, which
shows up good for the boys. These
boys are juniors in the Illinois col-
lege at Jacksonville, Ill.

These hogs were fed 175 days and
gained in that time some 270 pounds,
cost \$6.00 each at the time they were
bought so that it will be seen that
they were quite profitable. The gain
they made is actually phenomenal.

George Simpkin of Buckhorn
bought forty head of steers averag-
ing 850 pounds and sold them re-
cently at 10 cents when they weighed
1247 pounds and all was gained on
grass in only eight months.

A. A. Curry sold three loads of
steers average 1150. They cost in
the spring \$8.70 and brought \$11.35.
He fed them grass and some oil meal
and cotton seed in addition to corn.
Arthur Swain bought fifty yearlings
last spring at \$9.10 when they
weighed 700. He gave them some
corn, mostly grass and sold them at
\$13.25 and they weighed 1070 aver-
age.

CLUB WOMEN IN FIRST
MEETING OF YEAR

Domestic Science Round Table Met
With Mrs. M. C. Hook—Program
of Unusual Interest Carried Out—
Society will Organize Sewing
Clubs to Sew for Poor in Jack-
sonville.

The first meeting of the year of
the Domestic Science Round Table
was held Saturday afternoon with
Mrs. M. C. Hook, 1206 West Lafay-
ette avenue. Reports of the secre-
tary, Miss Clara Cobb, and the treas-
urer, Mrs. Thomas Heaton, were
read. The new president of the so-
ciety, Mrs. W. D. Doying, extended
greetings to the club, expressing op-
timism and a desire to make the club
a factor for good in the community
this year such as it has never been
before.

An interesting talk was made by
Mrs. J. Parker Doan on food con-
servation and the Hoover pledge card.
Mrs. A. L. Adams talked on the
registration of women for the
service, calling attention to the date,
which is Nov. 7.

Mrs. Doan went into detail ex-
plaining the Hoover pledge card and
what it means to the nation. The
women of America can be of great
help in the husbanding of our re-
sources. The food control bill which
has recently been passed by congress
will give timely aid in this effort.
The Hoover pledge card must not
be confused with the bread card such
as they have in England and other
foreign countries at the present
time.

Mrs. Ben Lurton gave a review of
the book, "Magic of Dress," by Grace
Margaret Gould. Mrs. Lurton de-
scribed the different fashions of
dress and materials from the colonial
days to the present time. She ex-
plained the review by demonstra-
tions of various periods with living
models, which added very much to
the value of the address.

The 1860 costume was demon-
strated by Mrs. Frank Hargrove who
favored the company with a piano
solo. Mrs. Cullen Rigdon demon-
strated the correct house dress of
the present time, showing proper
materials and cap to match. The
correct dress for school children
from 10 to 14 years of age was demon-
strated by young girls in costume.

Mrs. Thomas Harber next demon-
strated the 1870 period and sang
"The Old Gray Bonnet." Mrs. Charles
Mathis in costume the 1870 period.
Mrs. J. N. Conover represented the
present day afternoon gown, while
Miss Clara Cobb demonstrated the
street costume.

Mrs. Harold Gay wore a modern
evening gown and sang "The Swallow
Song," by Dell Acqua.

Mrs. W. D. Doying, the president,
gave an outline of the work which
has been planned for the coming
year. The club will organize sew-
ing circles to sew for the poor in
Jacksonville instead of sending them
away from home. She illustrated
the idea and plan of work and gave
an exhibition of what she termed
"efficiency garments," that had been
made from things that usually go to
waste. Some were made of scraps
of new materials which are usually
thrown away.

By combining two or more of
these pretty and useful garments
may be made for the needy children,
or it may be that some one has a
garment which is too badly worn to
be of further use to the owner, but
could be made over into a good warm
garment for a child. It is with the
view of utilizing such materials that
the sewing circles are to be organ-
ized.

The committee selected for the
sewings is as follows: Mrs. John
Knapp, Mrs. Eb Spink, Mrs. E. L.
Gray, Mrs. Thomas Hopper, Mrs. Ad-
dison Taylor, Mrs. Hattie Doying,
Mrs. T. C. MacVicar, Mrs. Harry Cle-
ment.

The secretary announced that the
next meeting of the club will be held
Saturday, Nov. 3, instead of Nov. 17,
as was previously announced. Prof.
M. V. O'Shea of the University of
Wisconsin will address the club on
"Tomorrow—What?" The hostess
and her assistants served delicious
refreshments.

The next meeting will be held at
the home of Mrs. John F. Buckley,
301 East College avenue. Mrs. Hook
was assisted by the following: Mrs.
Charles Ator, Miss Lucella Blackburn,
Miss Courtney Crouch, Mrs. M. E.
Gilbert, Mrs. Ray Hartman, Mrs. T.
C. MacVicar, Mrs. A. C. Scarlett, Mrs.
C. MacVicar, Mrs. John Sheppard,
Mrs. Abe Wehl, Mrs. W. D. Roberts,
Miss Isabel Walker, Mrs. Emma
Smith, Mrs. Harry Gay, Mrs. Frank
Hargrove and Mrs. Herbert Capps.

TRAVELERS TO FLORIDA
If the weather will permit Eli W.
Crawford and Charles Rajohn ex-
pect to start Monday for Florida, go-
ing in a Ford car which they expect
to leave in the peninsular state for
the use of Prof. Stevens, Mrs. Craw-
ford's son-in-law. Gainesville, Georgia
will be the ultimate destination
and the gentlemen are anticipating a
pleasant trip. Briefly their itin-
erary will be by way of Indianapolis,
Wheeling, Virginia, Hagerstown,
Maryland, and on southward through
Virginia, North Carolina, South Car-
olina, Augusta, Georgia, Savannah,
Ga., Jacksonville, Florida and finally
Gainesville.

Mr. Crawford expects to remain in
Florida possibly till spring putting
in his time working some among the
orange groves, fishing, eating, read-
ing and variously as the inclination
dictates. Many friends will wish the
travelers a successful journey.

ILLINOIS WOMAN'S
COLLEGE NOTES

Miss Booth-Clibborn was a visitor
at the College on Tuesday, October
23d. She spoke at the morning
Chapel and at the evening Vesper
Service.

President Harker has been called
to New York City to attend an im-
portant Conference of one of the
Committees of the Board of Educa-
tion of the M. E. Church.

The entire student body has
heartily gotten into the activity
of raising the Woman's College
share of the student war fund. This
fund is to be raised by the members
of the Y. W. C. A. and Y. M. C. A.
through the colleges and universi-
ties of the country. The students and
faculty of Illinois Woman's college
are planning to raise One Thousand
Dollars thru self sacrifice. The
various classes have voted to spend
no money whatever except for ab-
solute necessities, and to give the
money thus saved towards the war
fund. The week from October 24th
to October 31st is known as self-
sacrifice week, and is being observed
as such by the students of the col-
lege. The fund of One Thousand
Dollars must be raised before De-
cember 15th.

The Student association held a
picnic in the new gymnasium Tues-
day evening, October 23d. A picnic
luncheon was enjoyed by all pres-
ent.

Dr. J. R. Hanley and party con-
ducted the Chapel exercises on Sat-
urday morning, October 27th. The
visits of the Evangelist are greatly
enjoyed by every one. The students
themselves have been taking quite
an active interest in the meetings
which are being held in Grace
church.

THE WONDERFUL new system of hot air heating that brings the comfort and convenience of a furnace-heated home within everyone's reach will be demonstrated and thoroughly explained by an expert from the Estate Stove Company.

Estate Hot Storm

--the Stove with a "Little Furnace" in it

is not a stove, not a furnace, but a heating system that combines the best features of both. It sets in the room like a stove, its exterior looks like a stove, but there the similarity ends. For its interior is utterly different from any stove you have seen—inside is built like a hot air furnace.

Don't fail to take advantage of this opportunity to see this wonderful heater demonstrated by an expert.

DEATHS

Bronson.

Thomas J. Bronson of whose
death brief mention was made in
Saturday's Journal was born near
Rochester, New York, about 75
years ago. He came to Illinois in
1880 and settled in Jacksonville,
where he has since resided.

He was united in marriage in
1870 to Miss Mary G. Snyder of this
city who survives him together with
the following children: Mrs. Pres-
ton Wood Jr., Anna M. Bronson
and Katherine Bronson, all of this
city.

For many years Mr. Bronson was
known as one of the substantial
business men of Jacksonville. In
the early days of his business ca-
reer he was a member of the firm
of Bronson, Mathers and Nellis,
dealers in saddlery and hardware.
Their place of business was where
the Peacock Inn is now located. The
firm was later known as T. J. Bron-
son and Co., Wesley Snyder being
the company. Afterward the busi-
ness was conducted on the east side
of the square. In late years he had
been engaged in the insurance busi-
ness.

For many years Mr. Bronson was
prominently identified with the Ma-
sonic fraternity of Jacksonville. He
was a charter member of Jackson-
ville lodge No. 570 and was one of
the three living charter members.
The two now living are J. H. Hack-
ett of this city and Dr. Charles Dat-
ton of Wakefield, Mass. He also

was a member of Jacksonville Chap-
ter No. 3, Jacksonville Council No.
5 and Hospitaller Commandery No.
31 Knights Templar.

He also was a member of the M.
E. church and was a member of the
Modern Woodmen. Mr. Bronson
was a man who commanded the
respect of the entire community. He
was of cheerful disposition and
numbered his friends by the score.
In his death the city loses a good
citizen and his family a devoted
husband and father.

Funeral services will be con-
ducted from the residence 281 West-
ster avenue Monday afternoon at
2:30 o'clock in charge of the Rev.
F. A. McCarty if it is possible to
secure him. Jacksonville Lodge
No. 570 A. F. and A. M. will have
charge of the services at the grave
and Hospitaller commandery will act
as escort.

VanPelt.

The death of Mildred Marie Van
Pelt, daughter of William R. and
Minnie M. Van Pelt, occurred at
Passavant hospital Friday afternoon
at 5 o'clock. The child was but nine
months old. Mr. and Mrs. Van Pelt
have lived in Jacksonville only about
six weeks, coming here from Grigg-
ville. They reside at 717 North
Main street. The body was removed
to the undertaking parlors of Wil-
liamson and Cody where it was
prepared for burial, and later will be
shipped to Griggville to the home
of Mr. Van Pelt's mother. Burial
will be made at Griggville. The
baby is survived by two brothers and
two sisters, besides her parents.

GENEROUS RESPONSE
FOR CHRISTMAS BAGS

LOCAL RED CROSS CHAPTER
SHIPS NEARLY THREE TIMES
QUOTA REQUESTED.

Central Division Places Quota For
Jacksonville at 650 Bags—Letter
From Chicago Does Not Reach
Here Until After 1657 Bags Have
Been Sent.

Citizens of Jacksonville and
Morgan county are familiar with the
splendid showing made by the Jack-
sonville Chapter of the Red Cross
thru the effort recently put forth
in behalf of Christmas bags for the
American soldiers in France. Few
however know that the quota for
the local chapter was 650 and the
number actually received and ship-
ped from the local Red Cross head-
quarters was 1657. It is expected
that the quota asked for will be
shipped to the American soldiers in
France but that the remainder will
be kept for distribution among the
American soldiers in this country.
If this plan is carried out it will
relieve the local chapter from all
obligations in connection with the
furnishing of Christmas bags for
the soldiers. While there is a per-
fect willingness to do more along
this line if it is desired yet it is
felt the large number of bags al-
ready shipped will be all that is
expected from the local chapter.

The local chapter of the Red
Cross wish to take this occasion to
express the sincere appreciation felt
over the fact of this generous re-
sponse on the part of the people to
the request of Christmas bags. They
wish especially to thank Mrs. Horace
H. Bancroft, chairman of the com-
mittee, Mrs. James H. Danskin, as-
sistant chairman, all members of
the committee, the principals of the
public schools, who worked so
earnestly with their pupils, Mr.
Fred Eyre and Mr. Nelson who gave
up so much of their time in wrap-
ping and strapping 43 boxes and
the many others who gave help in
the enterprise.

The record kept at the Red Cross
shows contributions from the
schools and other organizations to
be as follows, Priscilla Club, 79
bags; Kit Unit, 69 bags; Fine Point
22 bags; Josephines of the State
Street church, 11 bags; Junior Red
Cross Helpers, 14 bags; Northmin-
ster church, 42 bags; South Side Cir-
cle, 10 bags; Trinity Guild, 6 bags;
Illinois College, 44 bags; Illinois
Woman's college, 121 bags; Routt
college, 31 bags; Lafayette school,
62 bags; Franklin school, 62 bags;
Washington school, 81 bags; High
school, 16 bags; Freshman class
high school, 13 bags; sophomore
class high school, 11 bags; Senior
class high school, 4 bags; David
Prince School 83 bags; Morton
school, 24 bags; Jefferson school
sent 350 articles, namely 96 bars
of milk chocolates, 60 bars Ivory
soap, 88 packages of loaf sugar (20
squares per package), 86 sets of
gun wipes, School for the Deaf, 662
trench candles, Illinois School for
the Blind, 22 bags; New Berlin
church, 41 bags, Friday Social Cir-
cle, 28 bags.

The Christmas bags were ship-
ped on Oct. 13 and Oct. 15th. The
following letter under date of Oct.
20th was received at local Red
Cross headquarters on Oct. 21st
and was the first indication of what
was expected of the Jacksonville
chapter in connection with the
Christmas bags.

Letter From Central Division.
To Chapter Chairmen:

Christmas Packets.

The Red Cross wants one mil-
lion Christmas packets for our men
in France and at the National Guard
Mobilization Camps, National Army
Cantonments, etc. The Chapters
of the Central Division are being
asked to provide 155,000 packets.
The quota assigned to your Chapter
is given below. Approximately one
third of the allotment should be
delivered for shipment to France
to the Bureau of Supplies, Central
Division, 180 North Wabash Ave-
nue, Chicago, Illinois, before Nov-
ember 1st.

To facilitate the handling of as-
signments by Chapters, we submit
the following plans:

Plan No. 1:

Under separate cover we have
mailed you copies of A. R. C. 404:
"Suggestions for Christmas packets
for our men at home and abroad."
From this circular (copy enclosed)
you will obtain a general idea of
the nature of the packet that would
be acceptable, and a list of suggest-
ed articles.

All articles must be obtained lo-
cally except the Kahki-colored hand-
kerchief (1015 B) Writing paper
pad (1304) and Red Cross Check-
erboard (1035). These three ar-
ticles noted will be carried by the
Central Division stock room after
November 1st. Meanwhile, we sug-
gest that Chapters make small cloth
bags to contain the articles they
wish to send at once.

Plan No. 2:

In view of the fact that Christ-
mas packets destined for France
must be in Chicago by November
1st, we are prepared to fill your
order for packets all ready for ship-
ping.

The Division has a special \$2.00
packet made up of goods purchas-
ed in large quantities at wholesale,
carefully selected and packed under
our direction. We can save Chap-
ters money and time. Send in your
orders for any number of packets
to be shipped from here to final
destination at once and charged to
your account on our books. We can
also furnish packets costing up to
\$5.00 each in special lots.

In order to get the desired per-
sonal touch of your chapter and the
donor into the packet, we suggest
that you send us with your order
a suitable return post card with a
Christmas greeting and the words:
"This gift is made possible thru
the co-operation of the
Chapter and the donor whose name

and address we give. An acknowl-
edgment from you to the donor
would be appreciated." Send one
such card for each packet filled in
with the name and address of the
donor.

Send your order and cards to the
central division office at once as
we must allow time for production
and proper packing of the packets.

We especially recommend this
plan in view of the shortness of the
time in which to complete the neces-
sary shipment of Christmas packets
to France.

Plan No. 3:

In general, confectionery and other
estables, except of special kind
and limited quantity and packed as
stated in Circular 404, should be
excluded from Christmas packets.
It is suggested as an alternative
that chapters request the Bureau
of Supplies to purchase on their be-
half large quantities of supplies of
this nature to be shipped in original
boxes either to training camps in
this country or to France, such as
gross lots of chocolate, jellies, etc
Special Note:

Chapters are requested to turn
over their packets to the Central Di-
vision Bureau of Supplies for distri-
bution. In no case should packets
be sent to any particular camp or
cantonment, or company of men.

Please note that all shipments
should be made to the Central Di-
vision Headquarters, 180 North
Wabash Avenue, Chicago, Illinois.
Be sure to mark all boxes care-
fully, showing on the outside of
each box the number of Christ-
mas packets that it contains. Cartons
should not be used as the
contents are liable to be damaged
in transit. Please use labels or
markings similar to the enclosed la-
bel.

Kindly observe that one-third of
your quota should reach here not
later than November 1st. The balance
should be shipped to the same ad-
dress to reach us early in Decem-
ber.

Fruce D. Smith,
Manager Central Division.

Your Chapter is requested to pro-
vide 656 Christmas packets.

Will Have Kits For Sale.

The Kit committee of the Red
Cross will soon be ready to take or-
ders for Christmas kits in case any
one desires to make an individual
soldier a gift. The committee will
have different priced kits which will
be much cheaper than any individ-
ual could fill because the Red Cross
have made it possible to secure ar-
ticles at wholesale prices. Prices
and contents of kits will be quoted
thru the press within the next few
weeks. Any information relative
to these kits will be gladly given at
the Red Cross headquarters.

NOTICE!

Beginning November 1st the
U. S. Government requires that
each person buying a theater
ticket shall pay the following
war tax:

1 cent on each 10 cent ticket.
2 cents on each 15c ticket.
2 cents on each 20c ticket.
And so on up the scale.

This is your bit to pay to
carry on the war. Bring penny
change. All persons entering
theaters on passes, or through
courtesy of the house are re-
quired to pay war tax as per
schedule above.

ANNOUNCEMENT.

I hereby announce myself as a
candidate for county commissioner
at the election to be held Novem-
ber 6.

David Wilson.

Fred Ford was up to the city
from Waverly yesterday.

The man with
money
put some of
his earnings
in the Bank
when he was
young. He is
enjoying it
now.

Don't be working
hard until your
dying day
without any
money in the
Bank.
START IT NOW.

It is a comfortable feeling to know that you have
money in the bank, so that when your hair is white and
your steps grow slower you can enjoy the fruits of your
early saving.

The time to bank and save your money is when you
are MAKING money. Your earning power will not last

SURGEONS TALKED OF CARE OF WAR'S WOUNDED

Discussion of Methods and Care of Wounded in Battle Was Chief Theme of Discussion at Session of Surgeons of North America—Dr. Black Named on Illinois Committee for Discussion of Hospital Question—Prominent Men Present.

Dr. Carl E. Black returned yesterday from a week spent in Chicago attending meetings of the American College of Surgeons and Clinics and literary sessions of the Clinical Congress of Surgeons of North America. A large portion of the time was spent in a discussion of the relation of our surgeons to the army and navy and to consideration of the war in general.

The care of the wounded in France and other battle fronts has brought many new procedures. The first two days were devoted to a consideration of the hospital question for the whole country by a joint committee of the American College of Surgeons composed of a committee from each state. Dr. Black was a member of the Illinois committee.

The meeting at Orchestra Hall on Monday evening was of unusual interest and importance. Among the speakers were the secretary of the navy, the Hon. Josephus Daniels, Surgeon General Gorgas of the Army, Surgeon General Brainstod of the Navy, Surgeon General Blue of the Public Health Service, Col. Goodwin, representative on the Surgeon General of the British Army, Col. Dercle, representative of the Surgeon General of the French Army, Sir Berkeley Moynihan, probably the most prominent surgeon of the day in England, Major George W. Crile of Cleveland, now serving with the English Army in France, who came back to America to attend these meetings and who will return to France in November and Major Rist, who is called the Osler of France. Naturally all spoke of various phases of the war and especially of the preparation of the American doctors for work with the army in France.

These men and many others of equal prominence not only spoke at this meeting, but at numerous meetings during the week. Clinics were held all day in every Chicago hospital and in these especial attention was given to the class of cases likely to be encountered in war. The whole week was a sort of post-graduate school for the future army surgeon. Considering the needs of the army the week's meetings were probably the most important ever held in this country.

BEGINS LAST WEEK OF ADVISOR CAMPAIGN

Sidney S. Smith Will Begin Final Drive for Members of the County Advisor Club of Morgan County—Hopes to Complete Work this Week—List of Members Thus Far

Mr. Sidney S. Smith, who is representing the U. S. Department of Agriculture and in conjunction with the Morgan County Farmers Club is canvassing the farmers of this county for pledges to establish and maintain a county agricultural bureau has been engaged elsewhere for several days and unfavorable road and weather conditions have interfered with his work when in the county last week.

In his canvass thus far he has secured as many subscriptions as expected everywhere he has gone except in one community. Tomorrow he will commence driving the county districts and hopes to conclude the campaign this week. Tomorrow evening he will speak at Arnold. No other evening meetings are scheduled.

Those interested in the campaign are advised that there are many farmers who are ready to sign as soon as cards are presented to them. Mr. Smith urges these farmers to go to their bank and sign there as canvassing the farms is slow work and his engagements elsewhere are pressing him for time and he will not be able to personally call on every one.

Many tenant farmers when visited express themselves as willing to pay half the annual fee, if their landlords will pay the other half. In other counties this plan is followed quite generally. An advisor benefits both landlord and tenant and they should jointly meet the expense. Up to this time many large landowners have not given this matter much attention and it is hoped that they will get together with their tenants and get under the movement.

Strong Argument for Advisor.
The strongest argument in favor of a county advisor is that 1500 of the 3000 agricultural counties in the United States now have advisors and that practically no county which has had an advisor has given him up. In Illinois 26 counties have advisors and no county which has had one has abandoned the matter. Over ten thousand Illinois farmers are now contributing for advisors. In fifteen Illinois counties whose first three year period has expired the farmers have decided to continue the work for another three or five year period. If the advisor has been worth what he costs, these farmers know and express their opinion in continuing the work.

Our country is making an appeal to every farmer to help increase production and under an emergency act is asking the farmers to join hands with it now in securing county advisors. The United States helps pay the expense of the advisor and the money allotted to this county will be used elsewhere, if our farmers do not meet the requirements of the government. The following Morgan county men and women have patriotically responded to the country's call and signed pledges to pay ten dollars a year for three years to maintain a farm bureau and county agent.

DESCRIBES WORK DONE ON FRENCH RAILWAYS

Commander in Chief of British Forces Says Railway Development Has Been Contributory Cause of British Military Success Work Carried on With Great Rapidity.

London. — (Correspondence) — The railway has been one of the primary instruments of war from the day war was declared; and its usefulness has constantly increased with the increasing complexity of war's activities. Even in the past four months, the tonnage landed at French ports for the use of the British forces in France has increased by more than two-thirds, and this all has to be transferred by rail from French docks to the front.

Railways, are the arteries of war.

COVERLY'S
South Sandy Street

It was railway construction by the South African forces that made possible the conquest of German Southwest Africa, and again in railway construction that rendered possible the recent operations in Egypt, in Mesopotamia and in East Africa. Several hundred miles of railways have been laid in the Sinai desert with the help of native Egyptian labor, while for Mesopotamia and East Africa the necessary material and personnel have been mainly derived from India. In Sinai, the line from El Kantara eastward has been extended in the course of six months, and the freight traffic passing over it has increased threefold.

Extensive Railway Developments.

In France railway development has been most extensive. Enormous provision of railway stores and plants for use in France has been made by England during the three years of war. Rails, ties, plant and tools have been delivered in enormous quantities for use on the new strategic lines of communication. For three years, rails by the mile, locomotives by the hundred, and cars by the thousand have been pouring in a steady stream into France.

About half of these locomotives and cars have been obtained from British railways as a result of the restrictions placed on traffic here. Assistance has also been rendered by Canada and the other Dominions, and the great quantities of new rolling stock has been specially constructed here and abroad for use on the Continent. Hospital and armored trains have been designed and built, and special railway mountings of unique design have been improvised for heavy siege artillery.

In a recent dispatch, placed at the disposal of The Associated Press Field Marshal Sir Douglas Haig, Commander-in-Chief of the British forces in France, described the work done upon the railways in France during the past year, the success of which he says has been one of the contributory causes of British military success.

“We have traveled to the limit,” he says “the steady growth of our armies and the rapid expansion of our material resources had taxed roads and railways to their utmost capacity. The existing broad gauge and narrow gauge railways being insufficient to deal with the increasing volume of traffic, an undue amount of transportation had to be done by road. As winter conditions set in the roads deteriorated rapidly, and the difficulties of maintaining and repairing them became almost overwhelming. In order to relieve the roads, an increase of railway and light railway facilities became imperative and urgently necessary, and at a later date the needs of the army were considerably augmented by the adoption of a large program of new construction in the area from which the German armies had withdrawn.”

“The task of providing additional rails, materials and rolling stock was one of great difficulty. The successful solution of the problems of railway transport would have been impossible had it not been for the patriotism of the rail road companies of Canada they did not hesitate to give up the locomotives and rolling stock required to meet our needs, and even to tear up track

RHEUMATISM IS PAIN ONLY, RUB IT AWAY

Instant Relief from Pain, Soreness, Stiffness Follows Rubbing with “St. Jacob's Oil”

Stop “dosing” rheumatism. It's pain only; not one case in fifty requires internal treatment. Rub soothing, penetrating “St. Jacob's Oil” right on the “tender spot,” and by the time you say Jack Robinson it comes the rheumatic pain and distress. “St. Jacob's Oil” conquers pain! It is a harmless rheumatism liniment which never disappoints and doesn't burn the skin. It takes pain, soreness and stiffness from aching joints, muscles and bones; stops sciatica, lumbago, back ache, neuralgia and reduces swelling.

Limber up! Get a small trial bottle of old-time, honest “St. Jacob's Oil” from any drug store, and in a moment you'll be free from pain, aches and stiffness. Don't suffer! Rub rheumatism away.—Adv.

NO INDIGESTION, GAS, OR STOMACH MISERY IN FIVE MINUTES

“Pape's Diapiesin” for Sour, Acid Stomach, Heartburn, Dyspepsia

Time it! In five minutes your sour, acid stomach feels fine. No indigestion, heartburn, or belching of gas, or eructation of undigested food; no dizziness, bloating, foul breath or headache.

Pape's Diapiesin is noted for its speed in sweetening upset stomachs. It is the surest, quickest and most certain stomach antacid in the whole world, and besides, it is harmless. Millions of men and women now eat their favorite foods without fear—they know Pape's Diapiesin will save them from such misery.

Please, for your sake, get a large fifty-cent case of Pape's Diapiesin from any drug store and put your stomach right. Don't keep on being miserable—life is too short—you are not here long, so make your stay agreeable. Eat what you like and enjoy it, without dread of acid fermentation in the stomach.

Pape's Diapiesin belongs in your home anyway. Should one of the family eat something which don't agree with them, or in case of an attack of indigestion, dyspepsia, gastritis or stomach derangement due to fermentation and acidity, at daytime or during the night it is handy to give the quickest, surest relief known.—Adv.

U. S. BLUEJACKETS ASK FOR BRASS BAND

Want to Hear National Anthem Played Morning and Evening at Raising and Lowering of Colors—Claim Nothing Else Can do Justice to National Air.

Base American Flotilla in British Waters. — (Correspondence).—Uncle Sam's sailors here are asking for a brass band. They want it to play the national anthem morning and evening at the raising and lowering of the colors just as they used to hear it back home. About the only time they have heard the “Star Spangled Banner” since their arrival in these waters was when it was played on the chimes of the cathedral here. They may not even again hear it played there because the organist who knows how has just been conscripted into the naval branch of the British military machine.

The American bluejacket is intensely patriotic. So is his new-found comrade, the British tar. But the latter is reminded of his patriotism more often than the American bluejacket because “God Save the King” is played at the close of every theatrical performance or public function. The American stands at attention and salutes on occasions like these. He says he would like to do the same thing to the “Star Spangled Banner” but he seldom gets the chance.

The “Banner” which is the brief way the sailor has of naming the American anthem is played now and again in the United States Naval Men's clubhouse here by the combined string orchestra from the two tenders or mother ships here. But this is not enough, and besides, the sailors hold that nothing but a brass band can do justice to the national air and fire him with the proper enthusiasm.

Almost every evening here, groups of these youthful sailormen walk along the beach singing. Two of their favorites are “Don't Bite the Hand That's Feeding You,” and “America, I Love You.” And they don't forget “Tipperary,” which still is popular alike with British tars and American sailors.

INCREASE IN RUBBER EXPORT TO AMERICA

Batavia, Netherlands East Indies. —An outstanding feature of the rapidly expanding commercial intercourse between the United States and the Netherlands East Indies is the soaring rubber export to America, and on the other hand, the growing use of the American automobile in the colony. Despite the shortage of cargo space, East India's shipments of rubber to the United States have risen from 3,000 tons in the first half of 1916 to 9,700 in the corresponding period of the current year. Eight hundred and fifty automobiles were imported in the first quarter of 1917, nearly all from America, while 2,400 arrived in 1916.

The serious conditions arising out of the lack of cargo space threaten the country with an economic disaster, and urgent representations are being made to the colonial and home governments on the subject. Of the 1916-17 sugar crop, 2,500,000 tons last month awaited shipment, together with 1,500,000 piculs of the coffee crop, 88,000,000 pounds of tea, 900,000 bales of tobacco and 2,000,000 tons of rubber, copra and oil.

SHORTAGE OF RED CROSS HELPERS IN FRANCE

Women's Council Faces Problem of Whether to Employ French Women or Send to America for Additional Helpers—Difference of Opinion Exists.

Paris, Sept. — (Correspondence of the Associated Press).—The “Women's Council” of the American Red Cross, which came into being during the summer organization through which American women in France might do their share of the work that is to be done, is now facing the problem of whether it must employ French women or send to America for additional helpers.

In response to an appeal to the American women in France to assist in the work, there have been found only about three hundred who are not already engaged in charitable or similar work, and this number does not suffice to carry on the numerous Red Cross activities that are particularly and peculiarly the function of women.

This number it is hoped will increase slightly, perhaps materially, when the summer season is over, and everyone is back in Paris, but it is doubtful whether there will be enough of an additional influx of volunteer workers to fill all the existing needs.

Both Methods May be Used

There exists a difference of opinion as to the best plan—whether to make use of the many thousands of French women who can be obtained, or whether to send for some of the equally large group at home who may have needful qualifications. The best present prophecy seems to be that both methods will be used.

Those who want to employ French women argue that, since much of the work for which they are needed is with refugee children whom the Red Cross is now systematically bringing back from the front zones, French women are best. It would be a difficult matter they say to procure the necessary number of Americans who can speak French.

Those who want to do all the work possible with American women rely on their argument that they are in a position to draw on trained women far better equipped for the work than almost any that could be secured here, and that the work should remain entirely and distinctively American.

The need for additional workers is chiefly felt in the Canteens, the refugees and Civil relief departments with its children's bureau, and the surgical dressing work. The nursing department will of course, become important but it is expected that trained nurses will come over as fast as they are needed.

Needs Will Increase

There is a lesser demand for helpers as visitors to tuberculosis patients, in the hospital auxiliary work, the Equipment Department having charge of uniforms, badges, etc., and in the Housing Department which looks out for hotels and pensions for the workers who are here. There will be more needs when the contemplated Blind, Diet Kitchens and Home Work Departments get fully going.

American women, who have gone into the work thus far, range from society women of wealth to poor art students and women who have scraped up a little money in the United States to enable them to come here for a time and help, and who in many cases must soon return if they are not paid for their labors.

DEPOSED RUSSIAN EMPEROR PLAYS WHIST

London. — According to a Petrograd dispatch, Nicholas Romanoff, the deposed Russian Emperor, passes a great deal of his time in playing whist, of which he is very fond. In pre-war times, whist was one of the most popular court diversions in Russia, and the Emperor had a special de luxe card which was made for his exclusive use. Over 12,000 decks of these Imperial cards were used every year, and they cost the Russian government about \$7 a pack, being made of the finest linen rags with a watermark of the Imperial crown and eagle.

When cross, irritable, feverish or
breath is bad, stomach sour, look at
the tongue, mother! If coated, give a
teaspoonful of this harmless "fruit
laxative," and in a few hours all the
foul, constipated waste, sour bile and
undigested food passes out of the
bowels, and you have a well, playful
child again. When its little system is
full of cold, throat sore, has stomach
ache, diarrhoea, indigestion, colic—
remember, a good "inside cleansing"
should always be the first treatment
given.

Millions of mothers keep "Califor-
nia Syrup of Figs" handy; they know
a teaspoonful today saves a sick child
tomorrow. Ask your druggist for the
bottle of "California Syrup of Figs,"
which has directions for babies, chil-
dren of all ages and grown-ups printed
on the bottle. Beware of coun-
terfeits sold here, so don't be fooled.

ILLINOIS COLLEGE NOTES

Classes in home nursing and first
aid have been organized at Illinois
College. The class in home nursing
is to be in charge of Miss Mattie E.
Coale, the anti-tuberculosis nurse.
The class in first aid will be in
charge of Dr. Walter Frank. Both
classes held their first meetings dur-
ing the past week.

Major E. C. Vickery met the squad
leader for preliminary instruction in
military drill at the Gymnasium on
Monday. Drill for the whole body of
the men students in College and
Whipple Academy was held on Wed-
nesday and Friday afternoons. The
young men are taking an enthu-
siastic interest in the drill. It is
hoped that arrangements will soon
be completed for securing uniforms
for the men. When asked for ex-
pressing of an opinion regarding
uniforms practically the whole com-
pany expressed a desire for them.

The college is soon to have a visit
from Mr. G. J. Little, State Student
Secretary of the Y. M. C. A. and
Mr. Hart, a young Canadian soldier
who has seen hard service in some
of the most important battles on the
Western front. Mr. Hart was in the
Ypres, the Somme, and Vimy Ridge
battles. He has lost an arm in the
service and has been decorated for
bravery.

The devotional exercises at Acad-
emy Hall Sunday evening will be
led by Prof. P. F. Whisler. His
topic will be "A Definite Purpose—
What It Accomplishes."

The students are planning to make
Christmas comfort kits for each Il-
linois College man in the service.
Dr. Charles B. Spruit, '08, was a
visitor in town Sunday. Dr. Spruit
has recently returned from Central
America, and was on his way to San
Antonio where he is to go into the
Medical service of the army. He has
been engaged during the last year
of two in some important research
work in tropical diseases.

Each year the girls adopt a new
scheme for adding a few dollars to
the Woman's Building fund. This
year they have prepared some very
beautiful souvenirs made from the
old walnut cornice of Beecher which
was erected in 1829. Pictures of
Beecher framed with molding made
from this walnut and paper knives
are attracting attention among the
Beecher lovers.

A special recognition meeting and
tea for the new members of the Y.
M. C. A. will be held Monday after-
noon at 3:45 in Y. W. C. A. room.

The College Glee club has been
organized with the following offi-
cers: President, Ralph Baker. Secre-
tary and Treasurer, Edward M.
Tomlinson, and Director Robert
Shoemaker.

At a special meeting of the Col-
lege Y. M. C. A. held Friday after-
noon, Clyde Land '19 was elected
President to succeed Francis Taylor,
'19, who resigned.

CONSIDER LEGALIZING OF MARRIAGE BY PROXY

London.—The question, should
marriage by proxy be legalized in
Great Britain for the special benefit
of men at the front, now is being
discussed at great length in the
newspapers. France has already
made this wartime concession, and
the Australian government has called
a conference of churchmen and
others to consider the adoption of a
proxy form of marriage between
Australians at the front and women
in Australia.

While soldiers from England gen-
erally have a chance of returning
on leave for the purpose of marriage
there are frequently difficulties in
the way and marriage by proxy
would probably be frequently em-
ployed if the laws permitted, espe-
cially in the case of a man severely
wounded or stricken with serious ill-
ness at the front.

GRACE M. E. CHURCH

Seven Thirty Sunday Night

It's Free

Fisher Will Sing

To the Public!

We are all looking for more trade, more work and improved conditions. This applies to the man in business
as well as to the producers.

The business man wants more customers, the customers want more work. Neither can be blamed for these
wants.

Now, it is only fair to say that if business men want the trade of a community, they should give preference to the
products of that community. The producers of another community are in no position to give their trade to this
community.

We have in mind a condition wherein 150 cigarmakers and their families, besides many others depending on
this industry for a living in this city. The wages earned by these people find a way into the regular business chan-
nels of Jacksonville merchants. The most of these merchants show their appreciation of this fact by patronizing
the products of our home factories. There are some, however, who ask and expect the trade of home people, and
who persist in buying brands of cigars made in other cities; cigars especially made in trust factories, under trust
conditions.

Only a few months ago a general demand was made in these trust factories for higher wages and better work-
ing conditions, so that the men and women could live more decently, and not be compelled to wear their last sum-
mer's clothing in the winter. They were met by the police with clubs, and by the courts with jail sentences for
their audacity. They were starved into submission. These acts, influenced by the trusts, show their utter heart-
lessness, their disregard of the needs and rights of others, especially those who made their products, who did no
more than attempt to improve their condition.

Cigars made in these factories do not bear the Union Label, yet there are some dealers here who persist in hand-
ling them, and even making a display of them, in preference to the superior home product.

Jacksonville has a record in the manufacture of cigars that is the envy of other cities. This was accomplished
honorably, after many years of patience by our manufacturers, in conjunction with skilled labor.

In the making of a cigar skill is required. Therefore it is required that an apprentice in a Union shop serve
three years before he becomes a journeyman. In a trust shop no skill is required; much is done by machinery, and
what is called the "team system", under which no employee makes a complete cigar. Specialization induces speed,
the trust sets a low price per thousand, the employee speeds up, and in this way is enabled to just about keep from
starvation; and these cigars, made under such conditions, are placed before us by some of our dealers in competi-
tion with the honest work, and widely known good character of Jacksonville cigars. These dealers say that they
are compelled to handle them because the travelling men demand them; the travelling man, who sells the drug-
gist his drugs, the shoe man his shoes, the clothing man his clothing, etc.

The travelling man has no particular concern for "home-made" goods, for he reasons like Thomas Paine, "The world is my country."
Well, let the dealer sell him what he wants, but it is not fair for him to entice our home people who earn and spend their
money here, with a big display of the stuff that "the travelling man wants", wear his money from him and send all above his profit
away to the trust and to those spiritless and weary work-slaves, who, by no process of reasoning, can return any part of it to these
local dealers in trade.

So of these dealers we ask; give us a little more favorable consideration. From the smoking public, which largely has favored
us with recognition in the past, we ask a continuance of same. To those who have turned their eyes to Detroit, Mich., Lima, O.,
Philadelphia, Pa., or Timbuctoo, we say that you can get no good from them. These 150 Cigarmakers and their families can do and are
doing far more for you than they. Therefore we ask your earnest consideration and more favorable and practical recognition.

Stop the "Snuffles"

If you want to make your distressed babies cry and comfortable, give **Foley's Honey and Tar.**

It is just what they ought to have for feverish colds, coughs, "snuffles," and wheezy breathing. It stops croup, too.

Foley's Honey and Tar tastes good and the little ones like it. It contains no morphine, chloroform or other drug that you wouldn't like to give to young children. Do not accept a substitute.

Mrs. D. H. Garrett, Schoolfield, Va., writes: "My baby was stricken with a severe cough and cold at one month old. I gave him ten to fifteen drops of Foley's Honey and Tar every three hours and it surely did help him. I've been using it ever since."

Red Blood and Courage!

(BY DR. W. C. LUCAS.)

What drives the men right up to the trenches in this war is courage, and it's red blood that "puts the heart" in the men. Did any one ever see a puny, thin-blooded man ever rush into the fight with any chance of winning out? With rich, pure blood you can face any hardship, reach any goal. But you are handicapped in the race of life without it. Every tissue, bone, muscle, should take from the blood certain materials and return to it certain others. When the poisons accumulate in the blood, perhaps the face breaks out in pimples, or boils appear on the neck, and we feel languid, tired, our vitality is at a low ebb, and we easily catch cold.

It's time to take an alternative extract and blood-purifier, taken from Nature's forests. Such a one is made up of Golden Seal, Blood and Stone root, Oregon Grape and Queen's root—extracted with glycerine and made into sugar-coated tablets or liquid, and this has been sold by druggists for the past fifty years as Doctor Pierce's Golden Medical Discovery.

NEGA, Ill. — "Some six years ago I was all run-down from work and worry. Am a blacksmith by trade. I had to give up work as I was so nervous at times I did not know what to do. I could eat scarcely anything, got so weak I could hardly walk from the house to the barn. Was in this condition for about a month when I commenced to use Doctor Pierce's Golden Medical Discovery and Pleasant Pellets. After using the above remedies I felt like a new person, and since that I have been using Dr. Pierce's remedies whenever I need a medicine. I find they do me more good than any medicine I ever used, and I am ever ready to tell others of the good they have done me and my faith in them."

ANNUAL MORGAN CO. POULTRY EXHIBIT

Will be Held in Gause Building on South Sandy Street Nov. 26 to Dec. 1st—Premium List and Catalogue Will be Out Soon—J. C. Weber is Secretary of Local Association.

Preparations are now being made to stage the eighth annual exhibit of the Morgan County Poultry Association Nov. 26th to Dec. 1st. The catalog and premium list is now about ready for the printer and will be off the press about November 5th. The association is again offering silver trophy cups, cash prizes and specials for the winning birds. It is thought that the exhibit will be held in the Gause building on South Sandy street. The show was held in these rooms two years ago and the arrangement of the rooms make it one of the best in the city for such an exhibit.

In quality the Morgan County show is one of the best west of Chicago. Poultry breeders claim it to be the best sales shows in the state. One out of town exhibitor last year claims that he sold over \$200.00 worth from his exhibit at the Morgan County show. He writes that he is coming back this year with a string of birds that will set the world afire, and has promised one of the largest entries ever made in the history of the association.

In Jacksonville the best bird wins, no matter who the owner is. This fact has been proven in the past and is what has made the Morgan County show what it is. "The best in the West," Mrs. John W. Clary and Mrs. James C. Weber will superintend the exhibit this year and with these ladies in charge all the exhibitors will have the pleasure of knowing that their birds will be well cared for. Mrs. Clary and Mrs. Weber know just what will tickle "Biddy's" palate and will see that she gets it. Ladies as superintendents are something new in poultry exhibits, but men are scarce and these two ladies kindly volunteered to take the job, and they got it.

All indications point to the exhibit being a large one. Requests for premium lists are coming in daily, and quite a few local exhibitors will be on hand with some dandy good birds that will help make the eighth annual one of the best ever.

Premium lists can be secured at any local bank or from the secretary, James C. Weber, after November 5th.

U. S. AIRPLANES PRAISED BY ENGLISHMAN

LONDON, Oct. 27.—Major General Sir David Henderson who is retiring as head of the British air board to undertake an important special duty, in an interview today with the Associated Press praised the American air plans but warned against the danger of overdoing standardization in aircraft. He expressed the belief that the American public should be prepared for fairly "severe" losses in air training from lack of skilled instructors.

In connection with the American air program, Sir David's only anxiety is that the American planes shall not be permitted to hinder the work of the British air service which is depending to considerable extent on the materials and training machines ordered in the United States.

"We all have been tremendously impressed with the plans of the United States for the air service. I think you will be extraordinarily skillful. But I am very anxious that what you are making for yourselves next year shall not react to the detriment or delay of what we ordered in the United States long since and need for immediate use."

"There are certain airplane materials for which we are absolutely dependent upon the United States such as spruce. Both in this and some other materials, the world's supply is so limited that we shall all have to be content at least partly with substitutes."

"I have seen only the plans of the new airplane engine, but it looks extraordinarily good. I think you may rest assured you have a solid plan."

Asked whether it was true that the British casualties in air training had increased considerably in recent months, Sir David said the total number of training casualties had increased heavily mainly because so many more men were training.

GUARDSMEN WILL HAVE CHANCE AT FRONT

WASHINGTON, Oct. 27.—Officers and men left in National Guard regiments which have been heavily drawn upon to fill up other organizations will have their chance at the front. It was disclosed today that the war department plans to use all these skeletonized units to form a reserve in France from which General Pershing may draw to keep his fighting forces always at full strength.

Secretary Baker and General Bliss chief of staff, explained the plan today to five New England governors, McCall of Massachusetts, Miliken of Maine; Keyes of New Hampshire; Graham of Vermont and Holcombe of Connecticut. Each of these states has national guard units which were stripped of men to fill up to war strength regiments assigned to the 28th division.

General Bliss explained that all officers would retain their rank when they became part of General Pershing's depot units.

ADMINISTRATIVE CODE OF LOWDEN PRAISED

EAST ST. LOUIS, Ill., Oct. 27.—The administrative code of Governor Lowden was summarized as "modern business management applied to state affairs" by Assistant Attorney General William H. Stead in an address at the convention of the Southern Illinois Editors' association tonight.

"Under the old system we had too many boards," he said. "If a law was passed which failed to create a new one it was an oversight. Six different boards in one way and another enforced the health laws. Every penal institution and every normal school had a commission of its own. Every activity running a railroad to fitting an eyeglass had a separate board."

"The administrative code provides for intelligent supervision of state finances. This code became a law largely thru the efforts of the present governor."

TWO KILLED WHEN AUTO SKIDS AND UPSETS

OMAHA, Neb., Oct. 27.—T. S. Perkins, Sioux City and F. A. Schick of Omaha were killed tonight when their car skidded and upset, going over a fifteen foot embankment or the Carter Lake Boulevard in the north part of the city.

When found the bodies of both men were pinned under the machine which had apparently been driven by Perkins, as he was on the steering wheel side. In the pocket of Perkins' coat was a telegram from his wife sent from Sioux City requesting him to meet her at the Hotel Martin in their home town.

CAMP TAYLOR

(By Staff Correspondent.)

Camp Taylor, Louisville, Ky.—Special—The threshold of military life is considered by the high command at Camp Taylor to be one of the very most important moments of the soldier's career. His first impressions, they hold to a great extent, shape the success or failure of his military training. It is for this reason that every effort is being made at this camp to surround the recruit's introduction to this new life with every possible pleasantness.

"It is not always sufficiently realized to what an extent the success of a soldier's training depends upon the impressions gained during the first few days of his military service."

This sentence is found in paragraph four of general orders No. 9 just issued to officers. The paragraph goes on to say:

"His mind from a military standpoint is open for fresh impressions; his moral courage, spirit and patriotism can be easily aroused and stimulated; he is unconsciously weighing the service, and much of his later value depends upon his first impressions."

As the door of circumstances closes at his back, shutting out, at least for a time, the civil life he has led, the recruit is ushered into a new world which has all the variety and spurs to ambition that the other life held for him, with the added qualities of excitement and exhilarating action.

It is at this induction period, according to the general orders, that the development of a soldierly spirit has its widest and most impressive scope. Here the man that was beginning to merge into the man of the present tremendous hour, and all the qualities that made him what he was in civil life begin to metamorphose into those qualities which will carve his destined notch in the new life.

We learn from this order, which it seems is destined to become an historical document at this cantonment, that "the development of a soldierly spirit is required to help the soldier bear cheerfully fatigue, privation and danger; to inculcate in him a sense of honor, to give him confidence in his superiors, in his comrades, and in himself; and finally to establish such a habit of discipline that each individual will perform his duty coolly and correctly in the stress of battle."

It is often alleged among civilians that there is too wide a gulf between the officer and the man in the ranks. Those outside the army sometimes decry what they contend is the "subject servility" of the private. Upon this point the high command says that it must be impressed upon the soldier that "respect for superiors is in no sense degrading, but is a military obligation, which the peculiar conditions of the soldier's life demand."

In this connection, let it be said that there is here a remarkable spirit of comradeship among the officers and the men in the ranks. Most of the officers are but three months removed from civil life themselves. They come from the officers' reserve training camps. They are college

men with ability and training. But also in the ranks there are many college men with equal ability and training. They are all, officers and men alike, engaged in a great, noble common enterprise, with one flag and with one imperishable aim. And while each man of them keeps his place, and each private does his little salute and performs the other duties which show respect for their officers, every man here, both officers and privates, know that these functions are for a single purpose—to build a winning army—and that down deep in their hearts they are beings of a kind, ascending to the same level by the heroic purpose of their lives, and between the highest and the lowest of whom there is but an insignificant difference.

"Much is heard nowadays of the 'morale' of an army. It will be drilled into the ears of recruits throughout their training. Morale is defined by Maj. Walter Krueger, to whose literary ability is due much of the clear expression of General Order No. 9, 'as the valor, courage and confidence of the army'—the confidence of the men in their officers and of the officers in their men, and the confidence of both men and officers in the power of their army and the righteousness of their cause. In the terms of engineering, it is said by Major Krueger to be 'the maximum bending point of the metal.'"

The design of the training here, as doubtless it will be at every cantonment, is to make that "bending point" so high that nothing which may ever befall the National Army in this war will cause the "metal of the army" to break.

General Order No. 9 is a document which will do the people back home as much good as it will the soldiers in the training camp. It discloses the attitude of the high officers of Camp Zachary Taylor toward the boys whom the parents of Illinois, Indiana and Kentucky have entrusted to their care. It shows that the fears of the boys who had visions of "hard boiled" man drive were unfounded, and that they have here a set of human beings to drill them in to bear arms with.

Medical officers in going over the causes of rejection of several hundred men in the second draft quota marveled at a number of cases which had passed some of the exemption boards. Two men were reported as being so nearly blind that the reason for rejection was reported "blindness." Two men had a glass eye each, and one of these could scarcely distinguish objects with the other eye. Eight were classified as being "mentally deficient." They were unable to answer the most simple questions. One of the men stuttered so badly he could scarcely talk at all. Out of more than 10,000 men examined to date only one has been rejected for being under weight. He was 30 pounds shy of the army standard. One man was rejected for having a club foot and another was so badly crippled in the foot that he could not walk without limping. Thirty-five of the rejects came from Illinois, 69 from Indiana and 104 from Kentucky.

Division headquarters has received many appeals from folks at home who want to know what they can do for their boys in military service. These communications have been turned over to P. C. Dix, Y. M. C. A. secretary, who declares that each

town can be of the greatest assistance by providing the company of men from their community with a standard athletic outfit. This outfit costs approximately \$60 and should include two footballs, two soccer balls, two volley balls, one volley ball net, two baseballs, two indoor baseballs, two bats, two indoor bats, one mask, one protector, one catcher's mitt, one first baseman's mitt, two sets of three pound quarts, six sets of checkers, two sets of chess, two combination crokinole and carrom balls and two basket balls. F. J. Gray, camp physical director, will purchase the equipment at wholesale for all communities writing to him.

Night classes for reserve officers have begun. Lectures are delivered by Regular Army men who have observed methods of modern warfare. The task of feeding, clothing and supplying an army division is immense. At least one special freight train filled with supplies for Camp Taylor is left on the railroad track alongside of the vast military depots each day. Six car loads of overcoats came yesterday, and Lieut. Col. Van Dyne, camp quartermaster, announced that another shipment is on the way. More than 15,000 heavy coats were included in the first shipment.

A large frame theatre where the best theatrical talent of the country will perform is being constructed at the camp.

The entrance to Camp Taylor probably will be changed from its present location on Preston street to Poplar level road. The latter is a public highway running through the camp from north to south, and the government likely will take it over. Division headquarters, which are more than a mile from the entrance, are located on Poplar level and are easier of access from the latter thoroughfare.

Several hundred aliens here among the draft men has presented a problem for the staff officers. Some of them are clearly enemy aliens, who have slipped by the draft boards. The general staff is awaiting for a war department ruling before taking any action in respect to these men.

John Hill of Pleasant Hill, Ill., football player at the University of Illinois, is among the draft men. The men have not learned all the bugle calls but there is one they certainly know. We sure do know what mess call means," said one of the new soldiers.

At Fort Benjamin Harrison, Ind., the officers' club has organized a club called "The Foreign Legion." It has 28 states of the union represented in its membership. The club has been reorganized here.

Lecture on gas attacks will be delivered at the camp by First Lieut. Lester J. Elford, who took a special training course at Fort Sill, Okla.

Clerks in the Camp Postoffice have sent out an "S. O. S." call. The office is swamped under an avalanche of letters, post cards and parcel post packages. Yesterday 174 stacks of parcel post packages and 12 pouches of letters were received. More than 25,000 letters and post cards were sent out. The work is made exceedingly difficult by incorrect or inadequate addresses on letters sent to men here. People writing to soldiers should be certain to state the company as well as the regiment in which their friends are located. For instance I saw a letter addressed as follows: "John Jones, Battery M, Field Artillery." There are three regiments of artillery here, and consequently three Battery Ms. The letter was delayed several days until the man's regiment could be ascertained.

Camp Taylor Shrapnel. James A. Lane of Pike county Illinois is the "homesickiest" man in camp. He was married just six days before leaving for the "front." When asked why he didn't postpone the nuptials until after the war he said: "Somebody else mighta got her."

It would be a sad day for the men of Central Illinois at this camp should Edward L. Helem of Shelbyville ever be removed from their midst. Helem has been appointed the official clown and leading joke-smith of the barracks. There is never a dull moment when he is at "home." The chief pastime of the men of this barracks thus far has been sitting on their cots after supper in the evening listening to Helem tell stories. Last night he told one that required 20 minutes in the telling. Occasionally he delivers an oration, using his cot as a platform. He has had three years in the regular army, is now corporal of his battery and is slated for a sergeantcy. Helem is married and his wife wanted him to claim exemption, but he says he thought of the words of his old army instructor who told him that when they went back to civil life and the country should ever need them, to be the first to answer the call, for, said the old army man "A home is no good without a country."

Richard M. Fairbanks, son of former Vice-President Fairbanks, is a captain of infantry at this camp. He is at present acting as major of a provisional training battalion. He is a graduate of Yale and received his military training at Fort Benjamin Harrison, Ind.

A jitney buss company has obtained a license to operate within the camp grounds. They will travel the principal roads from the car line and charge a fare of five cents. This will be welcome, especially to the Springfield boys, as they are more than two miles from the car line.

The division staff officers were dressed up in their best uniforms yesterday. They knocked off from their nightly labors long enough to attend "Believe Me Xantippe," a play now showing here. They were guests of the management.

One reason Theodore Morel is glad he is going to France is because he is a Frenchman who likes "le cheval." Dost know what cheval

is? In English it is horse meat. Morrell says there is nothing better than a fine, juicy cheval stake.

An information bureau has been established on the grounds. It is a building formerly used by the contractors. Lieut. W. A. Slick (a good name for an information bureau man) has been placed in charge. The bureau will take a big load off the division staff, who heretofore have been bombarded with such questions as, "Can you tell me where Harry Jones of Kentucky is at?" and "Where is the 337th company located?"

The following is a sample of a conversation between a stranger, perhaps a fond parent, and a colonel of the division staff on one of the colonel's busiest days, and explains why army officers pull their hair.

"Captain, it always adds to the little pleasures of life to address a colonel as a captain; can you tell me where I can find my boy?"

"What's his name?"

"William Soapstone."

"What department is he in?"

"He's a soldier here at your camp."

"Yes, I know, but what branch of the service has he been assigned to?"

"Well, I think it's company A."

"Company A in what regiment?"

"Well, I believe it's the provisional regiment."

"We have just 33 provisional training battalions at this camp. Can you tell me the number of his?"

"Well, now that I come to think of it, I believe he did write that he was in the artillery."

"The artillery is stationed on a hill two miles northeast of here and if you go to the headquarters of the artillery brigade you will find your boy."

And an orderly hurries "papa" out, courteously but surely, so that the colonel may continue his plans for defeating the Germans.

The information bureau has relieved this situation.

Col. C. F. Crain, provost marshal of Camp Taylor, is seeing to it that no one without business in the camp gets a pass. New passes are now being issued to take the place of those issued by the construction quartermaster to workmen. Up to Tuesday 500 persons had asked for passes and 300 of them were turned down.

The division staff has requested newspaper correspondents to appear in distinctive uniform and have recommended the following: A khaki suit, cut civilian style with lapels instead of military collar, khaki riding breeches, olive drab shirt, leather puttees and army shoes. The correspondent will also wear a white arm band bearing a red "C" standing for "correspondent." At times newspaper men making their way from the camp at night have been suspected as deserters from the draft army, and were caused considerable trouble by corporals of the guard who were attempting to carry out orders to let no one in civilian clothes out of the camp at night.

"ONE BLACK STAIN" ON MARTIN LUTHER

CINCINNATI, O., Oct. 27.—"One black stain" was mentioned in an otherwise general eulogy of Martin Luther by Rev. George Stewart of Evanston, Ill., before the Episcopal Church Congress here today.

Dr. Stewart, Dr. S. Means of New Haven, Conn., and Rev. St. Clair Hester of Brooklyn, apropos of the Lutheran quadricentenary discussed the debt of the Anglican church to Luther.

"Luther was a Democrat as regards ecclesiastical system but not politically," said Dr. Stewart. "In spite of our appreciation of his greatness we cannot forget one black stain on him. In the peasant revolt brought on largely by Luther's teaching, Luther urged the princes to help the peasants down with the warning that should the peasants be successful the princes would suffer."

The cost of feeding the people of London for a single day is estimated at \$1,125,000.

Great Oven Improvement

Saves Time—Saves Food—Saves Fuel

Note that heat travels completely around our high oven on 4 sides, while with common type ranges heat travels on 3 sides only. Anyone can quickly see that this big improvement in oven construction gives a much quicker and more even baking oven and that it would prove a source of big fuel economy. There is no need to turn baking—biscuits steaming on the table in half the time of the ordinary range—Pastry—Roasts—Baking—all browned perfectly with a big saving in time, food and fuel.

Cole's High Oven Range (Patented)

Oven flues connect firebox with oven—flues triple walled.

Polished top—note the fuel saving Hot Blast Draft.

Heavy boiler iron body. Heavy inside castings.

FARM PROPERTY

For years ahead the outlook for the farm is most promising and the most far sighted farmers are using their credit and cheap money to get possession of farm lands while they can be had. What many men need just now is nerve to back their judgment.

(1) Monday we looked over 200 acres of land located one and a half miles from a good thriving town and three miles from a nice little village and seven miles from the county seat. One-half of this land is as fine black land as you could ask and well tiled. Of the other half it is all good level timber soil, except about 30 acres which is a little cut with draws and ditches but no hills. This farm is fenced in convenient sized fields. There are 30 acres in blue grass, 40 acres in meadow, 116 acres of wheat, 96 acres of corn, balance stubble. There is a brick house of six rooms, an excellent barn for 14 horses, two oat bins, corn crib and room for 30 tons of loose hay. The entire barn is concreted. There is a granary for 1500 bushels of grain, big implement shed and stock scales, a three room tenant house and other out buildings. The wheat crop alone this year sold for \$5,000. For immediate sale and possession March 1st with taxes paid we can sell this farm at \$125 per acre, or will exchange for a smaller prairie farm north or east of Jacksonville. This is your opportunity.

(2) Southeast of Woodson we have a farm of 80 acres with a new seven room house, new horse barn, good cattle barn and excellent hog barn and all in good condition. Farm is mostly in grass and can be had for \$9000.

(3) 150 acres in the south part of the county of which one half is good black land and the balance all good farming land except a few acres near the barn. The land is in high state of fertility, all fenced, fair house and plenty of other buildings. Must be seen to be appreciated. Price, \$150 per acre.

JACKSONVILLE HIGH LOSES HARD GAME

Defeated by East St. Louis School
by Score of 15 to 0—Local School
Weak in Open Field Tackling.

East St. Louis defeated Jacksonville on Illinois field Saturday afternoon by a score of 15 to 0. The visitors were heavier than Jacksonville and in addition had the driving power and outclassed Jacksonville in speed in the back field.

The score does not begin to tell of how bitterly the battle was fought. At times Jacksonville showed great defensive football and at one time held the East St. Louis plunging backs inside the three yard line and took the ball on downs.

At other times, however, they were unable to solve the visitors' offense and let them get away with a number of big gains when the runner should have been downed. Jacksonville also was weak in open field tackling and time and again the man with the ball was missed. Exceptional work was done on the defense by R. Smith and Tholen in tackling while Reeve was strong in intercepting forward passes. Bento and Vieira pulled down several long passes and D. Smith did good work on the offense, especially in hitting the line.

For the visitors Kemper played a strong defensive game at tackle while G. Finke and Orr were strong on the offense. Orr was particularly strong in carrying the ball from a fake punt formation and made a number of good gains. The visitors were good at intercepting forward passes and one of these resulted in a touchdown.

Neither team was able to make much headway against the opposing line and the game developed largely into a punting duel in which the visitors had the better of the argument. East St. Louis also was better in receiving punts and running them back.

East St. Louis scored her first touchdown in the first quarter. After an exchange of punts Jacksonville fumbled the ball inside her ten yard line and East St. Louis recovered the ball. They put the ball over on the second play on a delayed pass. Goal

was kicked making the score 7 to 0. At the beginning of the second quarter the ball was in the possession of East St. Louis but Jacksonville compelled her to kick. The ball passed over several times, then Jacksonville with the ball in the center of the field tried a forward pass that was intercepted by East St. Louis and the runner carried the ball over for a touchdown but goal was missed. Score, East St. Louis, 13, Jacksonville, 0.

Both teams fought hard in the third and fourth quarters but did not have the punch to put the ball over. Toward the close of the fourth quarter Smith made a bad pass for a kick behind the local goal line and the runner was downed for a safety, making the score 15 to 0 in favor of East St. Louis. When the whistle blew for the close of the game East St. Louis had the ball inside Jacksonville's five yard line.

MARVELOUS HUNTERS.

Natives of Australia Are Wizards in the Art of Tracking.

In endurance and speed the Australian aborigine is not the equal of the American Indian, and his weapons of wood and poorly fashioned stones are effective only at short range, but as a hunter the native Australian is marvellously adjusted to his environment. His success lies in an intimate knowledge of the habits of animals on land, in the ground, in trees and under water, and his wonderfully developed powers of observation.

He decoys pelicans by imitating their cries, catches ducks by diving below them, locates an opossum in a tree by marks on the bark or by the flight of mosquitoes, finds snakes by observing the action of birds and follows a bee to its store of honey.

Any animal which leaves a track, however dim, in sand, on rock or in grass falls an easy prey to the black fellow. Children are taught to track lizards and snakes over bare rocks and to find their absent mother by following tracks too indistinct to serve as a guide for a European. When a white man is lost in the desert or a child strays from home the final resort is to secure a "black tracker."—National Geographic Magazine.

CARRIER PIGEONS.

Messages They Carry Are Packed in Small Goose Quills.

The general notion that all that has to be done in forwarding a dispatch by pigeons is to catch the bird, tie a letter to its leg and then liberate it is wrong, as the method of attaching the message is of great importance.

Prior to the siege of Paris the method of affixing the message to the bird had not received that attention which it demanded, and consequently many dispatches were lost in transit.

At first the message was merely rolled up tightly, waxed over to protect it from the weather and then attached to a feather in the bird's tail. But it was soon found that the twine which kept the missile in place cut or damaged the paper, and therefore in order to prevent it from being pecked by the pigeon and from being injured by wet the dispatch was inserted in a small goosequill two inches in length.

The quill was then pierced close to each end with a redhot bodkin, so as not to split it, and in the holes waxed silk threads were inserted to affix it to the strongest tail feather. By attaching the message to this part of the bird's body its flight was not in any way interfered with.—Lone Scout.

Hunting the Emu.

The natives of Australia are ingenious. A black on discovering emus feeding on a plain will cover his back and head with an emu skin, allowing it to hang down well on the side toward the unsuspecting birds. In his right hand he will carry hidden by the skin a boomerang and one or two throwing sticks or "waddies." Then his left arm will protrude beyond the skin straight out to the elbow, and the forearm will be bent up, with the hand at right angles to it, thereby making a capital imitation of an emu's head and neck. Now and then his hand or head will be brought to the ground as if for feeding, and as the black walks along he imitates every motion of the bird while at the same time by means of the big toe he draws a spear along the ground. He proceeds thus until close enough to spear his bird.

His Trademarks.

When young Johnny came to a particular paragraph that said, "Have you any visible marks for identification in case of accident or death?" he rose from his chair and rushed over to a mirror near by to give himself a general inspection; then he returned to his task and wrote as his answer to this personal query, "Nothing except freckles."—Youth's Companion.

CHANDLERVILLE FARMER SHOOTS SELF IN FOOT

Half of Right Foot Torn Off—Walks Mile to Residence and is Brought to Passavant Hospital—Was in Selective Draft and Awaiting Call.

While out hunting Saturday morning Fred Krishner, a farmer residing near Chandlerville, accidentally shot himself in the right foot. Nearly half of the foot was torn off. Krishner was alone and walked a distance of about a mile to his home.

Dr. J. G. Franken was summoned and gave first aid and then brought the injured man to Passavant hospital by automobile where he received surgical attention from Dr. Black. His wife and brother who is a veterinarian at Beardstown came with him. Krishner was reported resting comfortably Saturday evening and no serious results are anticipated unless infection sets in.

Krishner is a young farmer who had been drafted. He had disposed of all of his stock, farming implements and products and was holding himself in readiness for the official call. Saturday morning he went out hunting. In some manner while turning his gun it was accidentally discharged, the charge striking the right foot.

The Pleasant Way to Travel

WOMEN IN WARTIME

Register for service. Your government wants to know—

1. Who you are.
2. Where you are.
3. What you can do.
4. What you will do.

You are not asked to go outside your home city, or even outside your own home unless you wish; you aren't asked to do one thing more than you can do. If you are already doing your "bit," register and let us learn what it is. If you aren't doing your bit, here is a good chance to start. Remember: Only war itself can determine the qualities which count in war.

Here is a card. At first it seems complicated, but it is made out for EVERY woman in the United States. When you are sorted out by the registrar is quite simple. For example—Here is a housewife; she is a trained club executive, has given some time to making a survey. She volunteers her organizing experience and her typing ability, three afternoons weekly. That isn't any more than you can do—if you will.

PAIGE
The Most Beautiful Car in America

FROM every viewpoint, the Paige "Six-39" is an ideal family car. It is large enough to seat five full grown passengers in luxurious comfort. It is small enough to keep gasoline and tire bills surprisingly low.

And as everyone concedes, it is handsome enough to be recognized as "The Most Beautiful Car in America."

The First Cry

Every woman's sympathy responds to the sweetness of a baby's voice. The little cry that echoes with the arrival of the new baby is perhaps the fondest and most cherished recollection of our lives.

Thousands of mothers owe their preservation to health and strength to the wonderful preparation "Mother's Friend". This is an external application which is applied to the abdominal muscles. It relieves the tension, prevents tenderness and pain at the crisis and enables the abdomen to expand gently. The muscles contract naturally after baby arrives and the form is thus preserved. It should be applied daily, right and morning, during the period of expectation. Its influence on the fine network of nerves and ligaments just beneath the skin is wonderful. It renders them pliant, and in this way aids nature to expand the abdomen without the usual strain when baby is born.

You will find this wonderful preparation on sale at every drug store. "Mother's Friend" is prepared by the Bradfield Regulator Co., Dept. C, 200 Lamar Building, Atlanta, Ga. They will send you an intensely interesting book, without charge, "Motherhood and the Baby". Write them to mail it to you. It is of the utmost importance that every expectant mother aid nature in her work. Do not neglect for a single night to use "Mother's Friend". It is absolutely and entirely safe.

LONGING FOR A CHILD

Young Wife Almost in Despair. Now has Beautiful Baby Girl.

There is nothing more charming than a happy and healthy mother of children, and indeed child-birth under the right conditions need be no hazard to health or beauty. Lydia E. Pinkham's Vegetable Compound has brought joy to many childless women by restoring them to normal health. Here is a notable case.

Omaha, Neb.—"I suffered from female troubles when I was seventeen years old. At eighteen I was married and my trouble was no better so I consulted a physician who said that there was not much I could do and I could not have children. I read of Lydia E. Pinkham's Vegetable Compound and decided to try it, and it has proved

worth its weight in gold to me for I am not only well but have a baby girl, so when I hear of any woman suffering as I was I tell her of Lydia E. Pinkham's Vegetable Compound." Mrs. W. HUGHES, 19 Majestic Apts., Omaha, Neb.

In many other homes, once childless, there are now children because of the fact that Lydia E. Pinkham's Vegetable Compound makes women normal, healthy and strong.

FORMER CZAR'S TRIP TO SIBERIA DESCRIBED

By Prominent Russian Who Had Personal Knowledge of Secret Journey—Members of Party Were Concealed While at Large Stations.

Harbin, Manchuria—(Correspondence of The Associated Press)—The journey of Nicholas Romanoff, formerly Emperor of Russia, from Tsarkoe Selo to Tobolsk, which was accomplished without the knowledge of soldiers and civilians along the railway zone which he passed, is described in detail by a prominent Russian now in Harbin, who has personal knowledge of the secret trip.

Because of the feeling against the Romanoff family it was not advisable to use the former emperor's own train. Instead three ordinary first class sleeping cars were provided for M. Romanoff, his family and their attendants. Three hundred soldiers also accompanied the party.

The train started from Tsarkoe Selo very early in the morning of August 15. M. Kerensky, the Russian premier, personally bade the former imperial family good-bye.

The journey required five days. All stops at stations were as short as possible, and the members of the party kept concealed while at large stations. Every evening after dinner the train stopped for an hour at some wayside station or remote switch that Nicholas and his family might have an opportunity to exercise. Throughout the trip he seemed to be in the best of health, and took an interest in his surroundings. He was extremely agreeable to all the members of the party.

The former empress, Alexandra Alix, remained in her apartment throughout the journey, where meals were served to her and her son Alexis. She had the appearance of a woman suffering from nervous prostration.

All the four former grand duchesses were in excellent health and seemed to be in lively spirits every day. All had their heads shaved, a practice popular with Russian women today in order to make their hair grow better. Little Alexis, although limping slightly, apparently had recovered from his recent illness.

At Krasnoyarsk, a Siberian city, where anarchical agitators hold sway, the railroad station for three days had been crowded with soldiers, who were anxious to capture the imperial family but when the troops learned where Nicholas and his family were being sent, they discontinued their hostile demonstration.

Tobolsk is the capital of the province of the same name, and was formerly the ancient capital of old Siberia. It has been an important refuge for political exiles for many years, and Nicholas and his family are quartered in a building originally erected for exiles and recently altered.

Rasputin, the monk, who figured tragically in the downfall of the Romanoffs, was born in the province of Tobolsk and erected a monastery in the capital.

LESSONS OF THRIFT.

Learn to Spend Money Only For Things You Really Need.

There are few persons so rich that they do not need to exercise care and forethought in their expenditure. Human needs, human desires, human sympathies, are so vast, occasions of outlay so beset all of us at every step that unless we are watchful we quickly find great resources reduced to nothing, without our knowing how. The speed with which money departs is one of the first lessons of experience to man, woman and child, but we are slow to apply our own experience in our judgment of others.

Every one should be taught from childhood to weigh the needs of expenditure. This I must have, this I can go without, this I greatly want, if other demands still more imperative are not balked by it. By buying this now I can avert the necessity of a double expenditure a year hence. On the other hand, if I refrain from a purchase tempting at the moment I may be glad of my self control, even within a week. Questions like these have to be settled by every human being. Can any training be more important than that which enables us to settle them?

Exactly the same disposition to weigh and to compare must be brought into giving, into charity, if giving is to be discreet and wise and not in the end injurious to giver and receiver both. If we want a useful test for the difficult distinction between avarice and thrift we may say that thrift is more sparing with self than it is with others, whereas avarice pinches others sooner than itself, although it may pinch both.—Youth's Companion.

THE CITY OF QUEENSTOWN.

It is a Seaport, a Watering Place and a British Naval Station.

Queenstown, numbering slightly more than 8,000 souls, has a threefold distinction—as a seaport, a watering place and a British naval station. It is a well built and attractive place, with a mild climate, and, being built upon an island, its streets rise in terraces one above the other and offer a superb outlook over the neighboring waters.

Within fifty years the place was only a small fishing village and was known as the Cove of Cork. Its present name was received in 1849 by reason of its having been the first spot in Ireland upon which Queen Victoria set foot. It still serves as the port of the city of Cork, from which it is twelve miles distant. Cork itself is located at the point of entry of the river Lee into the bay.

The harbor of Queenstown is splendidly defended by two forts—Carlisle and Camden—at its entrance and by Fort Westmoreland, which is situated upon Spike Island, one of the group of three isles which make up the government dockyard and constitute the fine natural breakwater of the harbor, wherein a large fleet can find safe anchorage.

Two years before the queen's visit to the town Spike Island was made a convict depot upon the abolishment of the transportation scheme of punishment, which had been in vogue, and the convicts sent there were employed upon the fortifications. The island ceased to be a prison in 1885, at which time it was handed over to the military authorities.—National Geographic Society Bulletin.

Positive Jurors.

A prospective juror, being qualified for a murder trial in Illinois, when asked the customary question, "Have you formed or expressed an opinion as to the guilt or innocence of the accused?" rejoined promptly: "Sure. He's as guilty as all get out!" Which resulted in a \$10 fine by the outraged court and, of course, the disqualification of that taleman.

There was a murder case that ended right in the middle when counsel, wheeling gently at the jury, remarked, "Of course none of you gentlemen has made up his mind yet as to the guilt or innocence of this defendant." Taking advantage of a rhetorical pause, a lanky juror arose and replied positively: "Well, I have, for one. He ought to be hung!"—Kansas City Star.

Where We Get Nux Vomica.

With the exception of Ceylon, which exports a limited quantity of nux vomica, British India is said to supply the world. Nux vomica seeds and pickings are obtained from the plumlike fruits of the tree. The fruit is collected and the seeds washed out and dried in the sun. In the forests of Nellore, where the tree is common, the seeds are washed out by a forest tribe, the Yanadis, and a good price is obtained for them. Cochla nux vomica is collected in the dry deciduous forests at the foot of the Travancore hills and is sold at a low figure to small native dealers, who send it to the merchants.

BRITISH WAR OFFICE OWNS FILM BUSINESS

"Topical Budget" Passes into Hands of Army Council for Duration of War—Will Illustrate Happenings at Front.

London—(Correspondence)—To its thousand and one activities the British War Office has now added the ownership and management of a British film business. The entire control of the issue of what is known to the moving picture world as the "Topical Budget" has passed into the hands of the Army Council for the duration of the war.

By the unwritten law of Whitehall the War Office cannot "go into business," so the difficulty of owning and controlling this film business was obviated by the appointment of a committee of practical men, responsible to the War Office.

The idea of putting out official topical pictures twice a week, illustrating the various happenings on the fronts, and incidents in this country connected with the war, came from France, where the government decided some time ago regularly to issue films from the front as a means of keeping public interest steady in the progress of the war, and stimulating public support for its prosecution.

Starting as a strictly national survey of war's doing, the War Office Topical Budget has blossomed quickly into an international concern by a system of interchange with the Allies, so that now it presents to the British public scenes from every front on which the Allies are fighting, except the Russian.

British pictures will be distributed thru the War Office to France, Italy, Portugal and all over the British Empire, as well as to the United States. Neutral countries, too, are to be organized for the distribution of these same pictures, and in return certain pictures from neutral countries will be sent here for distribution thru the British Isles.

The official film photographers will not confine their work to the front. They are also to take pictures of all national events, naval, military or otherwise, happening in the British Isles.

GERMAN SALMON BRED IN THAMES.

London, Oct.—Some good things come from Germany, and one of them is the German salmon, which is now being bred on a large scale in the Thames and has the advantage of being non-migratory. At least it is non-migratory in its native waters, but it may change its habit here, as happened with the English and American brook trout which were planted in New Zealand. In English waters the brook trout is never migratory, but in New Zealand they rapidly developed into confirmed sea rovers, and have now become a fine and healthy race of sea trout, affording excellent sport and attaining unusual size.

SUIT IS FILED TO ADJUDICATE LIEN

Cocking Cement Co., Files Suit to Get Payment of Money Due on State Aid Road—Suit Friendly as to County and State.

The Cocking Cement Company, yesterday filed suit in the circuit court against the County of Morgan, the state highway commission, Department of Public Works and Buildings, Hannan-McDonald Co., of Chicago and J. Petru receiver for the Hannan-McDonald Co., to adjudicate a lien.

The suit is only a friendly one insofar as the county and state are concerned. It having been brought at the suggestion of the State Highway commission and the county commissioners. The bill is directed against the Hannan-McDonald Co. and J. Petru receiver for said company who are holding up the payment of the money Mr. Cocking has due him on the state aid road between this city and Chapin.

Mr. Cocking said yesterday that he did not want the impression to get out that he was having trouble with the county or the state. The only object is to secure money which is due him and which cannot be obtained in any other manner because of the lien filed by the Hannan-McDonald company.

When Mr. Cocking was doing some road work in Christian county a few years ago he did some work for the Hannan-McDonald company. He could not collect his money, amounting to about \$2,100, he says, and he brought suit against the company. Mr. Cocking said that the company in turn filed the lien and that in his opinion it was only done to harass his company. Bellatti, Bel-

lati and Moriarty are attorneys for Mr. Cocking. Malcolm E. Greenleaf has filed proceedings in foreclosure against Alpha T. Baker and Hazel D. Baker.

WENT COON HUNTING.
Sheriff Grant Graft was telling his friends a story yesterday about a coon hunt which he took with a party of friends Friday night. The Sheriff said the party got one coon and two opossums and that he shot one of the animals out of the top of a large tree. The Sheriff is usually a truthful man but he will have to invite us to the feast before we believe this story.

CO. B MEN HAVE GREAT REPUTATION AT LOGAN

TRANSFERRED TO OTHER ORGANIZATIONS THEY ATTRACT ATTENTION.

Reflect Credit on Old Company By Conduct and Strict Observance of Rules of Military Courtesy.

The men of old Company B that have been transferred to other organizations have attracted attention to themselves and reflected credit on the old Company B, by their soldierly conduct and unflinching observance of the rules of military courtesy.

Courtesy, among soldiers, is prescribed in the manuals and in the Articles of War, and the extent of its practice in an organization is indicative of the degree of training and discipline in that company, or of its "bringing up" as one might say.

No officer passes thru Co. B, street without the command "Attention" by the first soldier that sees him. Nor does he enter a tent without every man there coming to attention, head uncovered, remaining so until put at ease by the officer. And in the mess hall, should an officer enter, no one eats until put at ease.

These practices have been instilled into the men of "B" until it is habitual with them and now that a few of them are thrown with strange men from other companies, the result of much training is very conspicuous as has been remarked, time and again, by officers of the other outfits.

Especially now, when the old company is being scattered to all parts of camp and friendships of long time standing are broken, the men conduct themselves as soldiers and while they may not be especially pleased, they do not grumble.

The members of the old company can feel proud to say wherever they may go that they are from Co. B, 30th, Illinois Infantry.

Co. B. Men Are Now Regular Police
The boys are assigned beats, furnished with billy clubs and a badge and have taken up their duties in earnest. ILLINOIS COUNTIES IN MAGNIFICENT SHOWING

Illinois Counties in Eighth Federal Reserve Districts Subscribe \$6,000,000 Over Minimum Allotment—Chairman E. E. Crabtree Makes Announcement of Figures Saturday Evening—Madison Banner County of Illinois.

St. Louis, Oct. 27.—In a statement issued tonight E. E. Crabtree, chairman of the Illinois counties included in the eighth federal reserve district, gave the figures showing the magnificent record in the Liberty Bond Campaign made by the forty four counties in Illinois included in the district.

These figures show a total of \$20,567,250. As the minimum allotment for these counties was \$14,436,000, it appears that bonds have been taken to the amount of \$6,131,000 over the minimum amount. When it is remembered that in the first liberty loan the total subscriptions were \$7,731,909 this record is all the more creditable, and the excess above the minimum allotment this time is almost equal to the total subscriptions at the time of the first loan.

Of the forty four counties in the district, thirteen have "hit the target"—that is, the total subscriptions have equalled or passed the maximum allotment. In twenty six other counties subscriptions fail to come up to the minimum allotment. The bankers are very confident that within a day or two the subscriptions in all but one of these counties will reach the desired mark.

As it is now, in the five counties the bonds sold are only \$150,000 below the allotment, and as so indicated, the bankers are sure that this amount can be readily wiped out. In fact, it is entirely probable that a considerable portion of this amount has already been subscribed but has not yet been reported. Bankers have until Wednesday night to make their final reports and so other good figures are expected.

Madison county is the banner county for Illinois. The maximum allotment for this county was \$1,780,000 and the minimum allotment \$1,343,000, while the bonds sold total \$2,345,000. The result thruout the district shows very clearly how patriotically and enthusiastically the bankers entered into this work and also how loyally the public co-operated with them in the campaign.

REMEMBER PASSAVANT HOSPITAL.

Attention is again called to Passavant hospital, a worthy institution in our city and deserving of assistance at the hands of the charitably disposed. The institution could make use of a large quantity of apples, many hundreds of bushels of which are going to waste in this county. Persons kindly disposed who have cars could easily run out into the country and bring in a few bushels without any trouble to speak of. Farmers are busy now and while willing to give the apples have not time to deliver them. And there are many people in and about Jacksonville who have vehicles or automobiles who could just as well as not bring in a few bushels to the hospital and a few from a good many would be a winter store for that institution. It is a little late but not too late to do this good work. Will not some person undertake this work, which is certainly for the Master.
